

October 26, 1939

My dear Huxley,

Thanks for your letter and enclosure to Matthews, which I am sending on to him, with the solutions. I am afraid, if 'Nature' publishes our letter this week, that your amendments will be too late. I hope, however, as it stands, it will not be misleading as to the further tests you have made with monkeys, especially as the determination of the threshold may, perhaps, need some further experience.

Yours sincerely,

Zoological Society of London.

Regent's Park.

London, N.W.8.

OUR REF. _____ JSH/GG.

YOUR REF. _____

Professor R. A. Fisher, F.R.S.,
The Galton Laboratory,
Rothamsted Experimental Station,
Harpenden,
Herts.

Dear Fisher,

Thanks for your note.

You told me definitely that I was to await a proof from "NATURE", when corrections could be made. I have had no proof. I don't think it is very serious, but all the same I don't think the arrangements were very satisfactory!

Yours ^{ever} sincerely,

Julian Huxley
