Dear Fisher

Thank you for your letter, which
has reached me here where I am
intending to summer to the Lyons
- I hope Dunn will take it up
as a standard research animal.

As I think I told you, I am
unwilling to send to the Committee
at the moment, as I have not
been very well lately, & want to
devote all my energies to various
books. Also I shall be away
a part of the time during the
coming 6 or 7 months.

If you don't mind having a
figurehead on the C^{tee}, all
right, but then it'll be
that. No very much

Can-Saunders is coming in.

It seems to me very important

to have pros, cons, &

neutrals all on the C^{tee},

otherwise the report will be

badly pulled to pieces in Council.

Yours ever

Julian Huxley.
