

April 14, 1942

Dear Julian,

I am so glad you are home at last, and in time for the excitements at the Zoo. I think there is no doubt of how the majority of Scientific Fellows will react; but I suppose there is a fair body of voters of whom nothing particular is known. I hope we may get some press paragraphs published in the fortnight before the meeting to guide their attitude.

It is fine that you will be with us on Thursday.

Yours sincerely,
