

July 24, 1940

My dear Huxley,

Thanks for your letter of July 23rd. I am quite sure the Guillemot data would give us no trouble whatever. I suggest that Southern might send a copy of what he wants actually dealt with. I should expect to be able to return the results in a day or two, and we could then discuss interpretation. Only if this latter raised any special difficulty would it be worth his while to make a visit here.

Many thanks for sending me the offprints you mention, which I am very glad to have.

Yours sincerely,
