FLAVINS IN THE METABOLISM
OF LACTOBACILLUS ARABIOSUS 17-5

A Thesis
presented in part-fulfilment of the requirements
for admission to the degree of Doctor of Philosophy
of the University of Adelaide, by

Alan M. Snoswell, B.Sc. Hons. (Adel.)
Biochemistry Department
University of Adelaide.
PREFACE

The work described in this thesis was carried out in the Department of Biochemistry, University of Adelaide, and was supported in part by Research Grants from the Commonwealth Scientific and Industrial Research Organisation and the National Health and Medical Research Council of Australia.

I am grateful to Professor Sir Mark Mitchell for permission to work in his department; to Professor R.K. Morton and Drs. D.E. Keech, P.M. Nossal and E.S. Holdsworth for helpful discussions and advice during the course of this work, and to all members of the Department of Biochemistry for their help and encouragement. I am also grateful to Dr. J.H. Coates of the Agricultural Chemistry Department for the Ultracentrifugal examination of the lactic dehydrogenase.

The experiments described in this thesis were carried out solely by the author and have not been submitted for any other degree.

A.M. Rossell

CHAPTER 2

Enzymic activities of Lactobacillus arabinosus associated with flavins

INTRODUCTION 51
METHODS and MATERIALS 53

RESULTS
Dehydrogenase reactions of Lactobacillus arabinosus 64
The role of flavins in the aerobic and anaerobic growth. 66
The oxidation of pyruvate and lactate by cell-free extracts. 69
A survey of flavoprotein enzymes. 70
Separation of flavoproteins on cellulose ion-exchange resins. 75
The formation of orange-coloured flavoprotein compounds. 77
DISCUSSION 79
SUMMARY 93

CHAPTER 3

Anaerobic terminal hydrogen acceptors of Lactobacillus arabinosus

INTRODUCTION 96
METHODS and MATERIALS 99
CHAPTER 3 (continued)

RESULTS

The overall synthesis of fatty acids. 111
Individual steps of fatty acid synthesis. 113
Nitrate reductase activity of *Lactobacillus arabinosus*. 121
Fumarate reductase activity of *Lactobacillus arabinosus*. 125
Other possible terminal hydrogen acceptors. 126
The role of manganese in the metabolism of
*Lactobacillus arabinosus*. 127

DISCUSSION 130

SUMMARY 148

CHAPTER 4

The oxidation of lactic acid by *Lactobacillus arabinosus* and the associated role of flavin.

INTRODUCTION 151

METHODS and MATERIALS 157

RESULTS

Fractionation of the partially-purified lactic dehydrogenase. 163
Properties of the partially-purified lactic dehydrogenase. 165
