The Chancellor of the Adelaide University (Sir John Gleneri Justice Rym) has received a letter from Mr. Thomas Hensch Beard, who was the first South Australian Scholar (1877) and who is now professor of mechanical technology at University College, London, in which he writes:—"I must thank you for your kindness and courteous letter. I always feel that whatever success I may have achieved is in great part due to my old masters. I believe that good teaching is the key to the excellent guidance I got in my Alma Mater at Adelaide. I take a great interest in the progress and prosperity of the University, and an aim to see it steady widen thefield of my work. I sincerely hope, too, that it will try and help all students with the greatest manner of the people who are exposed all day in doing their living. The old universities of this country are making a bad mistake directing them in the various university extension movements."

Adelaide, 23/II/1940

Smith, first class; J. A. Haslam, third class, and second class; J. A. Newall, second class.
The application of Professor Archibald Wat-
sen's processes to the purification of sewage was discussed by Dr.
Koch's treatment of consumption was con-
sidered in a discussion on Saturday morning, and it
was decided to recommend him to this mission.
He leaves by the Norddeutsch-Lydia on the 19th of this month.
Dr. Watson, who is a graduate in medicine
at the University of St. Andrews and at the Royal College of Surgeons of England, has occupied the position of
Elder Professor of Anatomy at the delay of the University of St.
He possesses unusual qualifications for the task,
being a capable pathologist and a student of bacteriology.
When he arrived in Germany about the end of the year,
Dr. Watson is, we understand, prepared to go
without fee or description, and his position as an
officer of the University and the hospital,
without private practice, will give him
additional status among the medical men
who are in Berlin engaged in the study of this
cure. A number of the professor's friends,
including his brother, Mr. W. J. Watson,
Mr. Walter Rys, saw him on board the steamer 
last evening.
