WHY IT IS.

AN EXPLANATION.

In previous issues of "On Dit" articles have appeared on the general quality of the modern community life for its youth. In this manner the student is debased, his virility and even his relation to it is destroyed. The student has been deprived of his natural instincts and grains and made too sensitive. Now, set out to offer him an explanation. This is the student, the man of ability entertaining the student for his accomplishment. The student is a producer. To him go the advantages of the production, the nominal benefits of the economy and the success of his institution. In an interpretative examination that is his only way of combining his material interest with his education. In the student body the whole student is developing his body and his capacity for the life that is before him. He has his time to study outside the German. He will not get another chance like this when he comes to the University. And he is to be offered the chance to use his body to the best of his body. To be in the University system today is almost an industry in itself. A student is a necessary part of the body. With no sound and even a good industry, these students will not be trained. The students are required to go through a normal system, but some standard is necessary, but some standard is necessary. The students are required to go through a normal system, but some standard is necessary. The students are required to go through a normal system, but some standard is necessary. The students are required to go through a normal system, but some standard is necessary. The students are required to go through a normal system, but some standard is necessary. The students are required to go through a normal system, but some standard is necessary. The students are required to go through a normal system, but some standard is necessary.

MUDSPOTS

(AND OTHER NOTES)

"Mud in his pants and down." - Rev. Mr. Ivan Miller.

Mr. Ivan Miller has changed his looks most completely. First he laid his hair away, then his beard, then his glasses, and now his pants and down are gone.

"God has always been against the making of mud in our opinion." - Herr Leibsch von Scharita.

We are publishing several articles in the paper for which we have not space. We cannot get the Editorial Staff to give us a break.

Recruiter's Women's Union

On Friday, Tuesday, 9th, June.

Dear Sir,

We have received the following communication.

"On Dit."

Dear Sir,

What about Mud in Mudhut?

Yours ever,

Mudhut

(b) Any additional regulations for these social functions will be determined by the Union Committee.

(c) Any additional regulations for these social functions will be determined by the Union Committee.

(d) Any additional regulations for these social functions will be determined by the Union Committee.

(e) Any additional regulations for these social functions will be determined by the Union Committee.

(f) Any additional regulations for these social functions will be determined by the Union Committee.

NOTICE

To future applicants: the following rules will be applied to the Union Committee.

As this paper is to be a record of the activities of the Union Committee, it will be remembered by Club Secretaries.
The University Settlement Idea.

There was a time when our country held the attention of the world as a leader in social and financial matters. It was a time when our countryivaried, and our people lived in peace. It was a time when our country was a leader in scientific research and intellectual advancement. And in those days, our country was known for its universities and colleges, which were filled with students from all over the world.

But those days are over. Our country is no longer a leader in social and financial matters. It is no longer a leader in scientific research and intellectual advancement. And our universities and colleges are no longer filled with students from all over the world.

This is not a time to be complacent. We must take action to ensure that our country once again becomes a leader in these areas. And one way to do this is to establish a new type of settlement, called the University Settlement.

The University Settlement would be a place where students from all over the world could come together to study and learn from each other. It would be a place where students could engage in intellectual pursuits and scientific research. And it would be a place where students could learn about the diverse cultures and traditions of our country.

The University Settlement would be a testament to the spirit of cooperation and unity that once characterized our country. And it would be a reminder that we are all united in our pursuit of knowledge and understanding.

Let us work together to establish the University Settlement. Let us ensure that our country once again becomes a leader in the world of science, education, and culture.

SNOBS AND SLUMS.

There has recently come into being the University Settlement Group. Its purpose is to enable students to work with and for the underprivileged, to provide them with education, training, and social services, to organize them into effective collective agencies, and to foster a sense of community and solidarity. The settlement is being organized in the University area, and its work is being carried on by a small number of dedicated workers, who receive no pay except for their personal expenses. The settlement is not a substitute for the work of the university, but it is a supplement to it, and it is hoped that it will contribute to the development of a comprehensive social service program in the University area.

Many people (and among them many students) are taking a very active part in the settlement work. They are doing their best to make it a success. They are learning a great deal from the experience, and they are gaining a new understanding of the problems of the underprivileged.

A recent report of the settlement work has been made by the University Settlement Group. It is well worth reading, and it is available from the settlement office. The report is a valuable contribution to the understanding of the problems of the underprivileged, and it is a model of social work practice.

DO WE WANT TO WIN?

The Captain's Job.

It is a very nice fact that one can be a good captain without being a good sailor. But the other way around is not true. A good sailor cannot be a bad captain.

The man who wants to be a good captain must have a lot of experience. He must know what he is doing and what to do when things go wrong. He must be able to make quick decisions and carry them out. He must be able to lead his men and keep them going even when the going gets tough.

In the Navy, where the captain is in charge of a large ship, this is very important. The captain is responsible for the safety of the ship and its crew. He must be able to make sure that the ship is always ready for action and that its equipment is in good working order.

In the military, where the captain is in charge of a smaller unit, this is also very important. The captain is responsible for the discipline and morale of his men. He must be able to keep his men focused and to keep the unit moving forward.

In the business world, where the captain is in charge of a company, this is also very important. The captain is responsible for the success of the company. He must be able to make sure that the company is running efficiently and that its products are competitive.

In all of these situations, the captain must be able to make quick decisions and carry them out. He must be able to lead his men and keep them going even when the going gets tough.

DO WE WANT TO WIN?

The President's Job.

The President of the United States is the most powerful man in the world. He is responsible for leading the country and making sure that it is successful.

The President must be able to make quick decisions and carry them out. He must be able to lead the country and keep it moving forward.

In the past, the President has been able to do this. But in recent years, the President has been unable to do this. The country has suffered as a result.

In the future, the President must be able to do this. The country needs a strong, capable leader.

In the past, the President has been able to do this. But in recent years, the President has been unable to do this. The country has suffered as a result.

In the future, the President must be able to do this. The country needs a strong, capable leader.
Society

The Science Association will hold their last meeting for the year in the Lady Symon Hall on Monday, the 26th instant, at 8 p.m. The meeting will discuss the latest developments in science.

EDWARD SHANN

I knew Edward Shann since I was seven years old. During my last year in school, I often used to go out with the boys and play together. Edward was always a good student and worked hard at his studies. He was always interested in new things and would often ask questions. He was also very friendly and would always help others.

W. K. Oliver (M.), with 285/10 was the highest scorer, and was congratulated by H. D. Rockhill, of Yandles, Olliford, Mr. A. M. Gallichan (M.), and W. G. Harrington (M.).

The Emergence's match was won by N. C. H., U.D.C. and the Thames appeared to be the best team.

Particulars of Adelaide's score:

The Intervarsity Athletics. The University Oval held the - Inter-Varsity Athletics. The University Oval held the Inter-Varsity Athletics on Wednesday, 6th May, in the presence of His Excellency the Governor (Winston Churchill). The finals were heavy, and as many events were contested as possible, although the times registered were expected to be reduced to a week from to Saturday, 9th May, the Inter-Varsity Athletics, but one exception: the 100-yard hurdles, which were won by Mr. C. A. Letts, a student of Cambridge University, who set a new record of 10.5 seconds. After the final results were announced, the Governor presented the trophies and certificates to the winners, and the Vice-Chancellor of Oxford University presented the runners-up certificates. The event was covered by many photographers, and a large crowd of spectators watched the contests.
