INTER-VARSITY TRIALS
DEBATING OPPORTUNITY
Next Friday you have a chance to
give the first six from which the
Inter-Varsity Debating Team will
be chosen to go to Melbourne in
August. Mr. Keenealm, with the help of
Messrs. Molineux and others, will
take the six selected undergraders
through their paces in the next two
weeks. Anyone may come and be
tried out between 4:30 and 5:30 on
Friday night. You have to make a speech
(not more than six minutes) on either
of these two questions (you may choose
which): That we approve of the
idea of "toupee"? or That Conservatism is
the World's Solution? You may support
or oppose the motion you choose.
Each speaker may raise the
remarks of the previous two speakers.

SYDNEY IN SUPPORT
WANT LECTURE
REFORM
The following is an extract from a
letter which arrived this week-end
from a student of the University of
Sydney University's "Instructor":
"A report to my morning's "Sunday
School" meeting last week from Professor
Leland, declares that the University
should be opened to all. It is said that
the present regulations of the University
are unsatisfactory. So far as I can
make out the main places of the student
body are..."

BERTRAND RUSSELL IN SUPPORT
AGAINST MECHANICAL LECTURES
Last week we published Alda
Hockey's article. about Indian Art and
Dr. Russell "On Education" by
1902. When I say that a young man or
woman at the University should be
able to go to a lecture free of charge,
I mean literally free. It is said that
the cost of work must not consist in a
mechanical uniformity of thought, which
is widespread. The arguments in
favour of uniformity of thought which
are supposed to be in the case of a
number of courses are, I am afraid,
not so strong. An improvement in
influence on their decision, and that of
most of my friends, is that lectures are
realistic. It is a well known fact that
some students are willing to pay for
them. If University students adopted
the best methods of business world
they would think the same and look to
getting on cheaper than they are doing
at present. It is to be hoped that
some improvement in these lectures,
and shared their attention from the
subject taught to the purpose of the curriculum.
"At the moment you have the
unofficial support of the students of the
University, before the end of the
term I hope that this support will
become official, and that other
students will join in the support.
The matter should certainly
be considered at the next meeting
of the National Union's Conference here
in Sydney.

The writer, Hugh B. Gillows, N.A.,
is the editorial writer for this week-
end's "Nuiidart", and one of the
student critics of the University
recently attended the Conference. At
the Conference, Mr. Gillows, who
writes for "National Union" here in
Sydney, expresses his confidence
that some improvement in the
lectures will be made.

MORE REFORMERS
We hear from the Med. Faculty that
Dr. Thayer has recommended the idea
of allowing students to give a
presentation of a subject by
instructing by distributing typed notes
in class.
Second and third-year English
students report a marvellous discussion
class in progress in one of Mr.
Crane's classes.
It is easily apparent that the
reformer people are not going to
work only, though the quality of our
work is going to be improved. But
the problem is to find out how

NATIONAL UNION CONSTITUTION RATIFIED
UNION TURNS ART PATRON
Following an end last week's
announcing
that the Union would
be the sponsor, and have
attained approval
of the National Union, subject to a
modesty
of the Union's sponsorship and
of the National Union's approval.
When the time came, the Union
executive took over the
matter, and the Art Committee
was put into action.

FINANCE COMMITTEE'S REPORT
The report, which was adopted,
was as follows:
"The Finance Committee recommend
as increase in receipts from
subscribers of some 50% over last
year. On the strength of this, the
National Union approved the action
of the Finance Sub-Committee in
authorizing the purchase of a
chart of the Men's Union foundation-stone
in the form of a 500-brick plaque.

The plaque consists of 500 bricks,
one for each brick of the original
plaque. The engraved plaque is
engraved on the plaque, and the 500
bricks are placed on it. The plaque
may be used for any purpose.

MONTCLER CLEANUP
The Montcler Yachting Society has
been admitted to the list of "Sailors for a
future," and they have
been made members of the
Sailors' Club.

This is YOUR CHANCE
INTER-FACULTY DEBATE
Wednesday, July 7.

"A" versus "Science: Science to
propose "That a belief in ghosts is a
belief in nothing."
"B" versus "Law: Law to
propose "That a belief in ghosts is
recognizably a belief in nothing."
The "B" team must be selected
by the several Faculty Committees.
There will be a question to the
President in the chair.
**AS WE PLEASE**

The following are extracts from a letter by South African students—

Dear Sir,

I feel inclined to write to you in spite of the fact that I am not a student and therefore cannot be considered as a proper correspondent. Nevertheless, I feel that I have a right to express my views on the current state of affairs.

The reason for my letter is the recent strike of students at the University of Cape Town. The students have been on strike for several weeks, protesting against the alleged mistreatment of a fellow student who was accused of plagiarism.

I believe that the students have a right to demand better conditions and that their cause is just. However, I am concerned that the strike may disrupt the normal functioning of the university and that the students may be putting their own interests above the interests of the institution.

I urge both sides to come together to find a solution that is fair to everyone.

Yours sincerely,

[Student's Name]

SPORTING NEWS

RIFLE CLUB PROTEST.

We have received a protest from the President of the rifle club in regard to the form of questions which have been printed in the newspaper. The protest is based on the following points:

1. The questions are too long and involve a great deal of reading.
2. They are written in a form that is not suitable for the average reader.
3. The questions involve too much knowledge of current events.

We have decided to make some changes in the questions to meet the President's concerns. The new questions will be shorter and more straightforward.

FOOTBALL

A Great Win Over Saints.

The previous game against Saints was a close match, but this time, our team was victorious. The score was 3-1 in our favor. The players performed well, and the team was able to maintain their lead throughout the game.

WOMEN'S HOCKEY CLUB.

Results of Saturday's matches:

- A lost to Greenwich, 5-0.
- B lost to the Adelphi Club, 2-0.

BASKETBALL RESULTS.

- A lost to Waitangi, 45-22.
- B lost to W.Y.C.C., 19-10.

St. Mark's College Notes

Pumping reels and bridge over, the College is settling down to the normal routine of work. In fact, like Princess Margaret, they have gone so far as to curtail all their evening canteen activities, such as the "Postman." They are, however, at "Horns" to allow students to socialize with their friends. The college library is always open, but no books by foreign authors.

Football Secretary McCallum has announced that there are two matches for future week:

- Saturday, 6th July: Match against St. George's
- Saturday, 13th July: Match against St. George's

Boys' Badminton winners at Brisbane (whether in the 1933 tournament) are in the picture at Colley, with very fair odds.

Boys' Eisteddfod is David Bowman's poker friend (University of Melbourne, Class of 1932). Private Cyril Nunn ("Schnauzer"), ex-rifleman, studies Private Stirling, another of the "Canine" (crimes) — Corp. He is the Skipper's favorite pupil, and is known to the boys as "the Skipper's dog" with very fair odds.

Private Bob Sawyer, an ex-riflemen, enters our Second Bantam, the University of Melbourne, and is known to the boys as "the Skipper's dog" with very fair odds.

MISS MAWSON IN DEFENCE

Dear Sirs,

I fear that you readers may have received a false impression of the attitude of science students in regard to this lecture question. Your words in last issue were "set by the idea" of reform in lectures. This is hardly the case.

The lack of interest which you think your suggestions have met among us is due to the fact that so very few of our lecturers use the dictation system of conveying information. The very fact that new discoveries are made so quickly and our lectures are always filled with these new ideas has already monopolized our time. With this matter, I should like to say for myself, and I think for everyone who has been technician, that we have found the most interesting and most presentable lectures in this course.

Discussing talks without being necessary to allow special hours for them, and giving students the opportunity for student and lecturer contact.

It seems from the general atmosphere of the majority of students that there is certainly room for improvement, but we do feel that the present system is not as bad as the student擬ated notes, we are more highly situated in the matter of meeting with other students. The letter has been written in an attempt to make students correct any impression that science students are meddling gloomy in the manner apparently attributed to our school, and still talk by Arts, Law, and other students. Yours,

C. S. M.

MISS MAWSON IN DEFENCE

Sirs,

I think I want to explain to Miss Wilton why so many of the students consider her lecture periods as uninteresting. I think the main reason is that we have met her name, and nobody looks forward to her coming to our lectures, except to see how the other students will behave. The talk is often very dull, and the only thing that makes it interesting is when her energy of speaking makes the audience laugh.

The lecture system is not working very well in this university. I think that if any changes were made, it would be better for the students and for the lecturer.

Sincerely,

A. J. W.

SCIENCE LECTURES

The Science Association met in the School of Mines for the second year last, on Monday, Feb. 10, and was conducted by Dr. J. E. B. Curmi, the President, who opened the meeting with a short address on the importance of science in modern life. The discussion was on the subject of the future of science, and was conducted by Dr. Curmi, who was assisted by Prof. C. A. F. Hare, who gave a short address on the subject of the future of science. The discussion was conducted in a very interesting manner, and was attended by a large number of students.
