We have just received the following telegrams from the Governor-General's Committee.

First debate Queensland against South Australia on Monday August August Ape, Second Melbourne against Tasmania on Thursday, September 3rd.

This is from the official account of the University of Sydney, which is also the governing body of the student union. The assignments for the debate are as follows:

**Thursday's topics:**
- Mr. Keleti (President) - Speaker
- Mr. W. J. Halliday - Speaker
- Mr. J. A. Stirling - Speaker

**Friday's topics:**
- Mr. E. J. Morris - Speaker
- Mr. J. B. Maclean - Speaker
- Mr. J. H. Brown - Speaker

The assignments are to be made by the respective schools on the afternoon of the debate.

The assignments must be made by 10am on the morning of the debate.

Please note that all assignments must be made by 10am on the morning of the debate.

**Recovery and Boom.**

We seem to be approaching the end of a period of recovery in the country. With the new boom, British industry has been more marked than that of almost any other country. Our economic recovery has been marked by astonishing stability in output and in its income streams. This would, however, be a mistake to put this down to rearmament and to the recovery of the country, and not to the expansion of national income and employment.

National Income, 1932:
- $3,100,000,000
- $2,900,000,000, 1937

The national income is now increasing at a rapid rate, which is expected to continue for the next few years. The expansion of national income and employment is expected to continue for the next few years.

**The Unemployed.**

The number of unemployed has increased by 2 million since 1929, but there remains 3 million (10 per cent. of the potentially employed) still without work. Strikingly enough, the big increase in productivity has coincided with this re-employment. Increased industrial production, under strong increases in productivity and falling costs, has been almost exclusively for the home market. There is room for more employment and greater output, but it will not be easy for industry to absorb the next two million men as the numbers two million—some industries have already passed the increasing returns stage. Many of the unemployed are middle-aged, untrained men. Many are in the "depressed areas" where up to half the population is unemployed and the young employed men have left in search of work. It will be hard for industry to absorb this number and type.

**The Motive Force.**

The dynamic, the motive force in the workings of the fluctuations in income and employment is money in circulation. Where investment stops the economic system is out of order. The motive force and driving power of the economy, divisions of industrial investment, capital and consumption is now very low. This is the tail and which (Continued on page 3).

**Volunteers are needed to assist at the New Education Building, to be held on 1st and 2nd September.**

In return for your help, a free ticket to 100 tickets is available. Contact Mr. J. J. Lyshay, c/o Teachers' Training College.

VISITING LECTURERS

The visit of Mr. Colin Clark has meant for the economics students a week of lectures related to the field of research—that of National Income—in which he is a world authority. The privilege of hearing this fully appointed; the overflowing Physics Theatre or the enthusiasm of classes he addressed is ample endorsement of the Council’s enterprise.

This success should not be isolated. And to that end we have a suggestion to make. Would it not be possible to allot a sun EACH YEAR for this very purpose of bringing outside lecturers here for a season? We do not mean that they should be imported, necessarily. There are always a number of overseas men in Australia each year. Some of these visitors would be of great value to us, and the time taken to convey them to us would be specially worth while.

Would it not be possible to give a sun each year to one of our members to spend a week in the study of any subject that we might be interested in? It is believed that if a few men from various parts of the world were brought here to study the work of our industries, it would be the best thing that could be done for our country.

Such a scheme would not only be of great benefit to the Commonwealth, but it would also be of great value to the students who would have the opportunity of studying under the guidance of such lecturers.

We believe that the students would gain a valuable insight into the working of the various industries of the world, and would be able to apply this knowledge to the benefit of their own country.

We therefore recommend that the Council should consider this proposal, and make arrangements for the implementation of such a scheme as soon as possible.

VARIETY GUYED

“Who drive on ploughed fields?”

“We mean the second year,”

“This is the answer, ‘We spoil the wheat fields.’

In fact, last week-end second year geology students fixed their time for some concentrated field work around Victor Harbour, Loxton and the sort of thing which we have seen ages ago (not geologically speaking). We thought that Victor Harbour would be a splendid spot to work at for a number of reasons: it was not too far away, it was a very interesting town, and there seemed to be a great deal of geology there.

SHADES OF ERNEST ROLLS.

There will be a large crowd in the Architectural Design Room at the School of Mines next week. The students are meeting there to plan the Cotterrell Mistress. So, if you are interested in architecture, we suggest that you make a note of this meeting. It is a great opportunity for students to discuss and plan the Cotterrell Mistress, and to develop their architectural skills.

ONE OF LAST WEEK’S HEAD-LINES.

“Prof. Goldby on Nerves.”

We thought he was such an interesting man, too.

LABOR TROUBLE.

The members of the “Vassary” union have decided to make their presence known by holding a strike next week. They are determined that they will not allow their rights to be taken away without a fight. They are determined to show the management that they are not to be pushed around. They will not allow their rights to be ignored, and they will not allow the management to get away with it.

Since our bridge has taken so long to repair, we are sure that many people will appreciate the fact that it is in the future. Will anyone, returning from these holidays, commit suicide from it in the true tradition of bridge walkers?

VARSITY GUYS.

The President’s address to the varsity club members was received with great interest by the students. The President spoke of the importance of the varsity club and of the responsibilities that come with membership. He encouraged the students to take an active part in the activities of the club and to use it as a means of meeting new people and making new friends.

WHERE TO GO AND WHAT TO WEAR.

Geology bugs are beginning to take their place in the ranks of the students. This year’s fashion notes decree long pants, and shoes, a beret and striped blazer for the girls.

THIS WEEK’S QUESTION.

“Did he marry poor blind Neil?”

One answer to last week’s question was right. It was “Yes, St. Mark’s.”

WITH RESPECT AND VARIETY LIFE

Having flattered you by saying that you have always looked upon yourself as an University student, the feeling of happiness that surrounded the Campus is but one of the many things that I have encountered in my University life. The happiness of the students and the joy they feel in belonging to this great institution is evident to all who visit the Campus.

Letters from students at the University

Dear Madam Bla:

You've got me into a fine mess. In your letter to Penny last week I saw that you were stopping at the University at that time, so I took your advice, and when a certain student asked me to go out with him, I accepted at once. My bag was well packed, but, as I was not feeling too well, I went one better by putting a touch of garlic with my Virg... [Continued from page 3, column 4]

Dear Madam Hul,

I hope Penny goes to the debate on the subject of slavery. She certainly needs to get the subject taken after her letter and behaviour last week. I think the debate on the subject of slavery would be very interesting and educational. I would like to see the debate, but I am not sure if I can make it.

[Signed] ANGE

COMING EVENTS

To-day: 1.00—Glee Club, Lady Symon. 7.30—Commerces Students' Association.

To-morrow: 7.45—Inter-Union Debate, Tuesday: 1.30—Carnegie Composers Society, Lady Symon.

Friday: 8.30—Mansion House, Mount Lefty. 9.00—Union versus Woodlands. Debate at Woodlands.

Saturday: 6—Engineers' Ball.

Carbohydrate material available, still high the scarciy of plant protein. Now, carbohydrate meals are excellent for experimental purposes, too. The next thing I, and many other students, have to do is to get the sugar from the diet and replace it with plant protein. The results of this experiment will be fascinating.

The Editors, "On Dil'

Sir,—It appears to be quite easy to enter the "Varsity" grounds in the early part of the evening; but almost impossible to leave them, without the risk of being caught by one's guests. There is a double set of gates along the street, and we have a good time knocking on them. The gates are usually open, and there is a great deal of shouting and shouting outside. It is a noisy place, and it is not very sanitary.

I speak with great feeling on this subject, because it was two o'clock in the morning, and another a year ago. My name was taken by a constable for being on the list of "persons in attendance." Several different serious police notices were given to the constable, and he said that students attending to or leave or enter the ground after dark in this manner. The fact of being found with an injury is no mean one, and the trouble caused by the police is a serious matter. The police must be careful.

The Recreational menu looks as if it has been chosen for a children's tea. The catering firm referred to supplied a sort of food which I would not eat. I am not fond of your catering firm. (Signed) M. T. STEWART.

For some time the Recreational caterers have been anxious to see a turn-off along some of the lines suggested by Mr. Stewart. The trouble has been the lack of kitchen space. In Mr. Stewart's view that the caterers in the columns where the food is prepared are in the situation of the train in the building of a kitchen. This will naturally lead to a quick and more elaborate meal. Ultimately it will mean greater numbers, and even cheaper food—[Signed] Editor.

FOOD SUGGESTIONS.

Since the matter of food prices in the Recreational has been brought up in these columns we have had a number of suggestions on the subject. To begin with, you would not take up more than it is worth, and we are probably satisfied with them, but it would put our readers in the eyes of your laxity for enjoying a banquet. So we have received a direct action and handed these let...”
