Peace Group Resumes Activities

POLICY BRIEFLY OUTLINED

Creation of War Atmosphere Depressed

The Peace Group came to life once more last Friday when the pacific section of the old organization held a meeting in the George Murray as the first step towards setting up a group of people wishing to investigate the war problem.

The first speaker was Miss Clyde Waddell, who read a paper on the Peace Movement of Elia as an example of how ordinary, simple people in England, with little knowledge of such things, have been able to work for peace. Much needs to be said on war and its effects on the human side. Just as the Paris croupers were called to order. It is the same story for all the world.

The peace-loving people should be organized on a national scale to save the world. The time is ripe for such an effort to be made. The peace-loving people have a duty to save the world from war.

The meeting was attended by Miss Waddell, Mr. Brown, Mr. Johnson, Miss Brown, and Mr. Green. The meeting was adjourned.

Women's Stunt Evening

Laurels to Law

Five minutes of the Senate realized that "improving" is the interpretation of the term "improving." In an effort to improve the policy situation at the Senate, they discussed the issue of "HOPALONG RIDES AGAIN." Everyone agreed that the numbers of the senators were too small. A number of suggestions were made to improve the situation. The inter-Faculty draft was saved for another day.

Arts v. Law. bathtub quiz over "improving" policy on a very small scale. The Senate is now in session. The problem is to improve their policy, a topic on which many senators were very anxious to improve.

WOMEN'S COLLEGE AT LAST?

A meeting of those likely to be interested in women's colleges was held in the Lady Stirling, Sydney, yesterday. The President was Miss Billie Blue, B.S.E.

It was discovered that many girls would be interested in such a college. The following day's meeting was for the discussion of the proposal. Miss Billie Blue expressed her interest in the proposal. The motion was carried. A committee was appointed to consider the matter. The proposal was accepted by the Senate.

**THE UNIVERSITY CRITICISED**

By Professor J. H. P. Muddiman, M.B.E., F.R.G.S.

**THE SCIENTIFIC ASSOCIATION**

Tuesday, June 21, 1938

**THE FOREIGN EDITOR**

Tuesday, June 21, 1938

**From the Firth**

The Editor of “On Dit,” Mr. A., a well-known figure in University circles, has, on this occasion, decided to bring to our attention an incident that has occurred in connection with the University. It seems that a student, who is known to the Editor as a keen and active member of the University community, has been the subject of some unkind remarks in a recent issue of the student newspaper. The Editor has expressed his concern over this matter and has asked that the University authorities take appropriate action to ensure that such behavior does not recur. The Editor also mentions that he has been informed that similar incidents have occurred in the past and that the University has failed to address them adequately.

**Science Sits**

Much has been written on the subject of the impact of science on society. Until recently, science was considered to be a tool for progress and development. However, in recent years, there has been a growing concern that science is not always serving the best interests of humanity. This concern is not new; it has been voiced by scientists and philosophers for many years. The issue of the role of science in society has become even more urgent in the context of recent events, such as the global pandemic and the ongoing debate about climate change. The question of how science should be used and who should make the decisions about its application is a complex one that requires careful consideration.

**The University Criticised**

The University has been criticized for its handling of a recent incident involving a student. The incident involved a student who was accused of academic misconduct. Although the University has taken steps to investigate the case, many students and faculty members have expressed concern about the fairness of the process. The University has been accused of not providing adequate support to the student and of not fully considering the student's side of the story. The incident has sparked a debate about the University's commitment to academic integrity and the need for a fair and transparent process.

**Science Sits**

Science has the potential to make a significant contribution to the betterment of society. However, its impact is not always positive. The misuse of science can lead to negative consequences, such as environmental degradation and social injustice. It is crucial that we consider the ethical implications of scientific research and development. The responsibility of scientists to ensure that their work is used for the benefit of society is paramount. The University, as a leader in the academic community, should take a proactive role in promoting ethical science and ensuring that scientific research is conducted with the best interests of humanity at heart.

**Science Sits**

The recent events at the University highlight the importance of addressing issues of academic integrity and fairness. The University must work to establish a system that is fair and transparent, where students and faculty members feel that their voices are heard and that their concerns are taken seriously. The University should also consider the ethical implications of its actions and ensure that its policies and practices are aligned with the goals of promoting social justice and environmental sustainability. The future of science depends on our ability to navigate these challenges and to ensure that science is used for the betterment of society.
The PRESS GANG

"The Press may be absolutely free, the rights of the subject are inviolate and the government is tyrannical," said partisan Manly about a hundred years ago. Manly was undoubtedly right, but the struggle for which certain sectional interests are contending is not between the press and the government, he would have said, but between the press and the public; the roll of the press is not always the scroll of history, and the result of the struggle may be to set the public adrift in a sea of misinformation and delusion.

"What is the press in these times? It is the mouthpiece of our times," said Manly. And the mouthpiece of our times may become an organ of mendacity and corruption, if not correctly directed by the public.

The press is the mouthpiece of our times because it has the power to influence public opinion. It is the mouthpiece of our times because it has the power to shape public opinion. It is the mouthpiece of our times because it has the power to control public opinion. It is the mouthpiece of our times because it has the power to dictate public opinion. It is the mouthpiece of our times because it has the power to manipulate public opinion.

FIVE MORE BLUES

D. C. MEINZIG, EDITOR.
MARGARET COWELL, REPORTER.

At the Blues' Committee meeting on Tuesday last, five men received their blue for the summer sports. Among the five were Bill Malpass, with an excited countenance, and Jack McFarland, with his usual quietness. The other three were Tom Jones, with his usual exuberance, and Bill McFarland, with his usual seriousness.

WOMEN'S SPORTS

On Wednesday afternoon the charm of the University Oval was considerably enhanced by the presence of Reg and Lee. The game was full of interest for the 500 spectators who braved the heat to cheer on their favorite team.

The Blues' team was defeated by the University, but the match was a close one. The Blues' team was led by Reg, who played a splendid game in the backfield, and Lee, who was consistently good in the center.

FOOTBALL

On Saturday we were defeated at the West Park by the University. We were handicapped somewhat by the absence of Bill Malpass, with his usual quietness, and Jack McFarland, with his usual exuberance. The other three were Tom Jones, with his usual exuberance, and Bill McFarland, with his usual seriousness.

BOXING AND WRESTLING

The refractory presented an unusual sight last Wednesday night, with a large boxing match taking place in the center and an equally large crowd of spectators. Numerous boxes were fought, but the 'C's' representatives were not so successful as might be. Indeed, only three 'C's' entered the ring, with the result that a number of the 'C's' men were left with a clean slate.

ROCKY
c

We had a good win on Saturday against Forrestville, but one that was far from easy. After one had lost the last two weeks against the top team, Grimsby, we had gone back to our usual form, but this win was a real boost to the spirit of the team.

RUGBY

A lost to Woodville.

The match between 'Vanities' and Woodville proved one of the best exhibitions of Rugby, and one of the most exciting rugby games in the history of the sports. The contest was very close, with both teams showing a great deal of spirit and skill.

BASEBALL

Saturday saw the end of the first round of the A Grade baseball matches, and 'Vanities' is a solid even second, with 'Blind' and 'Blind' in a close fight for third place.
