COMPULSORY LECTURES A FARCE

NEITHER NECESSARY NOR USEFUL

WASTE TIME AND DESTROY ENTHUSIASM

Every year there is a fierce outburst against the system of lecturing which obtains in the University. Forging remedies have been suggested, some of which have been tried, but the results are not encouraging. The lectures which we are obliged to attend are, in fact, a waste of time and a drain on the enthusiasm of the student. The subject is treated in a superficial manner, and the method of delivery is dull and uninteresting. The lecturers, who are usually professors or other staff members, are not always able to make the subject clear and interesting. The lectures are usually given in large, dull rooms, and the atmosphere is not conducive to learning. The system is a farce, and it is high time it was abolished.

THE CASE AGAINST COMPULSION

The first point is that too much emphasis is placed on the importance of lectures in the University curriculum. The idea that a student who does not attend the lectures will not learn the subject is fallacious. Lectures are only one part of the educational process, and they should not be used as a substitute for other methods of teaching. The system of compulsory lectures is a waste of time and money, and it is unfair to the students who are not interested in the subject.

ARGUMENTS FOR COMPULSION

The chief argument in favor of compulsory lectures is that they are necessary for the proper functioning of the University. It is argued that lectures are necessary for the transmission of knowledge, and that they are the only way in which knowledge can be conveyed to a large number of students. However, this argument is fallacious, and it is based on the assumption that education is a one-sided process. The emphasis on lectures is a mistake, and it is time it was corrected. The University should not be a place for the transmission of knowledge, but a place for the development of ideas and the stimulation of thought.

LEGAL CHALLENGE

The University has a legal obligation to provide a proper education to its students. The compulsory nature of the lectures is a violation of this obligation, and it is time it was challenged. The University should provide alternative methods of teaching, such as tutorials and seminars, and it should be left to the students to choose the method of learning that is most suitable for them.

CONCLUSION

In conclusion, the system of compulsory lectures is a farce. It is a waste of time and money, and it is unfair to the students who are not interested in the subject. The University should provide alternative methods of teaching, and it should be left to the students to choose the method of learning that is most suitable for them. The system of compulsory lectures should be abolished, and the University should be left to function as a place for the development of ideas and the stimulation of thought.

DO NOT DELAY TELL THE EDITORS

TOYING WITH WAR

The Editor, "On Dit."

Have you noted our frequent references to war, and particularly in May, we have been referring to the disastrous effects of military service on the health and education of young men. The general issue is international affairs. The open conflicts of the past few years have serious consequences for our future. Let us all do our part to stop this "war fever" and work for peace. We must strive to create a better world, not through force, but through dialogue and understanding.

THE OLD STORY

TO-DAY we publish a lengthy plea for an alteration in the system of taxation. We believe that the present system is unfair and inefficient. We know at least one daily in which they are. If the issues at stake are to be resolved, it is essential that we understand the basic principles involved. This is not just an economic issue, it is a moral one. Let's work together to bring about a better system of taxation.

The feature, being the chief official means of instruction, is of vital importance to every under-

COMPLAINTS RESOLVED

Miss Ashby, striking a more serious note, said that under the old system of taxation, that man looks for any methods that give him the least possible loss. Under the new system, Menzies' rates are based on principles of justice and fair distribution of wealth. It is the duty of the ratepayer to pay his just share of the burden.

Mr. Turner, speaking second for the Government, moved to amend by substituting the word "tax" on the ballot paper as a war precaution. He stated that it is not the intention of the Government to increase the burden of taxation, but to make a fair distribution of the national wealth among all sections of the community, and to ensure that the wealth is used for the benefit of all the people of Australia.

The amendment was carried by a large majority, and the ballot paper was amended accordingly.

LAW UNIONS

The Editor, "On Dit."

I was rather surprised at the number of students who expressed the wish that I should resign from the Law Union in order to make way for the new and more efficient Editorial Board. I have not yet decided whether to resign or not, but I feel that it is my duty to try to improve the editorial standards of the Union, and I shall do all in my power to ensure that the Union continues to be a valuable and useful organization.

MINTS FOR SCIENCE

The Editor, "On Dit."

This country has much to offer in the field of minting for science. We have the opportunity to create mints that are not only beautiful, but also serve a useful purpose. Let us work together to develop a minting system that is both aesthetically pleasing and scientifically useful.

FIGHTING WORDS

To the Editor, "On Dit."

I would like to draw to your notice a small paragraph which appeared in the "Lexicle of Mr. Dafoe," reporting that Mr. Dafoe, being appointed by the Governor General, was at that time in England. I suggest that more careful research might be done before such statements are published.

MORE MUD

To the Editor, "On Dit."

It is quite surprising to see the amount of mud that is being thrown around in recent months. It seems as though everyone is trying to have his say, regardless of the source of the泥. I suggest that more consideration be given to the facts before making accusations.

FINES FOOTBALL WIN

On Saturday we had an excellent win against the University, 10-1. The game started with Action kicking three goals against the Phobos. As our disappointment, about three minutes after the second half started, the Phobos equalized with a penalty goal by Deahl. However, with Deahl out, the Phobos were not able to keep up their strong play, and our team continued to win, scoring two goals in the second half. The final score was 10-1 in our favor.

AGAINT OLD SAINTS

Three goals as the beginning of the third quarter against our opponents, but Deahl was on fire, and along with another goal from MacRobertson, we had a 10-3 lead. Unfortunately, the game was interrupted when MacRobertson was injured, thereby preventing him from playing for the remainder of the match. The final score remained 10-3 in our favor.

SPORTS' ASSOCIATION

SPECIAL GENERAL MEETING

On Thursday last a special general meeting was held at the Clubrooms at 7.30 p.m. for the purpose of electing a new slate of officers for a Sports Association meeting—much better than the annual general meeting.

The committee consisted of Mr. R. T. Bell, Mr. C. G. Bell, Mr. S. G. Bell, Mr. J. G. Bell, and Mr. D. G. Bell. The meeting was called to order by the President, who read the minutes of the last meeting. The Secretary then presented the financial report, which showed a surplus of $100. The President then presented the reports of the various committees, which were all approved. The annual general meeting was then called to order.

The minutes of the last meeting were read and approved. The President then presented the reports of the various committees, which were all approved. The annual general meeting was then called to order.

HOCKEY

As everybody knows, the weather conditions were not particularly pleasant, and the game of hockey was not played. As a result, the game was abandoned.

Philadelphia College of Pharmacy and Science

BOTH RUGBY TEAMS WIN

The main feature of Saturday's games was the final round of the Rugby Club's Rugby. The game was played on the school ground, and the final score was 20-12 in our favor.

SUPPORT OUR ADVERTISERS

CAR CLUB

Things have been happening with surprising speed for the Varsity and all cars in the area. A new car club has been formed to look into the formation of a Varsity branch of the Sports Car Club. Arrangements are being made for a meeting in the near future.

ABOvE: Sydney

Airon is the first of the Newcastle, which is probably still the high point in the annual varsity football meeting.

LACROSSE

BRIGHTON GIVEN A SCARE

On Tuesday afternoon our A team played Brighton at the Varsity Ground. The game started well, but as the second half kicked in, the team began to lose rhythm. However, after the half, we managed to score three goals and lead 3-0 at the end of the game. Brighton put up a good fight in the final ten minutes, but we managed to hold on to our lead and win the game 3-1.

PRIVATE SCALES

In times of stress, people often turn to extra measures. At MacRobertson, we understand the importance of maintaining a healthy lifestyle. That's why we offer a full line of private scales designed specifically for those seeking a bit of extra support. Whether you're looking to keep track of your weight or monitor your fitness progress, our private scales are here to help. With a sleek design and intuitive interface, each scale is designed to help you achieve your goals. Our private scales are built to last and are backed by our commitment to customer satisfaction. Order yours today and take control of your health journey.

WHERE IS THE young Law student standing? Along the line of the city's finest architects and engineers. The young Law student stands at the foot of the statue of Justice, reaching out for the hand of the law. The statue is flanked by two other law students, one holding the scales of justice, the other holding the book of law. The atmosphere is one of solemnity and respect, as the students stand in tribute to the ideals of justice and the rule of law.

PUBLIC PLACES

The MacRobertson Institute of Experimental Science is located in Sydney, New South Wales, on the banks of the Parramatta River. The institute is dedicated to the advancement of knowledge in the fields of science, technology, and engineering. Its facilities include a state-of-the-art laboratory, a library, and a research center. The institute is open to the public and is a popular destination for students, teachers, and visitors from around the world. The institute is known for its innovative research and cutting-edge technology, and it plays an important role in the community, contributing to the local economy and providing opportunities for education and employment. The institute is a hub of activity, with researchers and students working together to push the boundaries of knowledge and make discoveries that will change the world.
