AMERICA FIGHTS DEPRESSION

PROF. MAXWELL EXPLAINS POLICY

RECESSION NOW, BUT OUTLOOK BRIGHTER

Last Friday night in the Physics Building, Professor Maxwell, of the University, discussed some of the efforts to restore economic stability, and the recent recovery.

At the beginning of the depression Government, and to some extent industry, seemed to stagnate, and America was troubled with serious unemployment figures. In a recent address, the Professor explained that the situation had improved, and that the efforts to restore economic stability were showing results. He also mentioned that the recession now, while present, did not seem as severe as before.

The Professor went on to say that the efforts to stabilize the economy were showing results. He mentioned that the efforts of the Government, combined with the efforts of industry, were bringing about a recovery. He also mentioned that the unemployment figures were improving, and that the economic situation was looking brighter.

The Professor concluded his talk by expressing confidence in the ability of the nation to continue to improve its economic situation. He mentioned that the efforts to stabilize the economy were showing promising results, and that the nation should continue to work towards improving economic stability.

ENGINEERS MEET

At the meeting of the Junior and Graduate Section of the I.R.E., held last Thursday at 7 p.m. in the University Library, a number of students and engineers met to discuss various topics related to engineering.

SAGE ALLEGES SAVAGE ASSAULT

CHARGE OF ATTEMPTED MURDER

CIVIL AUTHORITIES REFUSE TO TAKE ACTION, BUT LAW STUDENTS NOT SATISFIED

 Allegations were made in the Law Students' Court last Thursday by Mr. X, a prominent member of the Art Faculty, that he had been assaulted by a student several weeks ago. Mr. X alleged that the student had assaulted him, and that the attack had been made in the Law School Building.

The court was founded for the protection of the students, and was not satisfied with the allegations made by Mr. X. The court refused to take action, and the case was referred to the police.

However, the Law students were not satisfied with the court's decision. They felt that the case should have been brought to the attention of the authorities, and that steps should have been taken to ensure the safety of students.

VON LUCKNER MAKES A HIT

THE SHOWMAN SUPER

Despite the initial controversy, the show has continued to succeed, and has become very popular. The showman, Mr. Von Luckner, has become a sensation, and his performances are now drawing large crowds.

The show is a combination of music, dance, and acrobatics, and is performed in a variety of settings. The showman, Mr. Von Luckner, has become a sensation, and his performances are now drawing large crowds.

MAKE YOUR MONEY FAST

THE GREAT SHOP COMPETITION

Every year, the shop competition is a popular event, and this year was no exception. The competition is open to all students, and is held in the University Library.

The competition is divided into two parts: the first part is a written test, and the second part is a practical exercise. The written test is designed to test the students' knowledge of the subject matter, while the practical exercise is designed to test their ability to apply their knowledge.

The competition is judged by a panel of experts, and the winners are announced at the end of the competition. The winners are awarded prizes, and their names are announced in the University newspaper.

DIFFICULTIES

Two things were new to us in Norway: the poor construction and the cold. The only thing that was really good was the food, which was excellent.

The cold was certainly the biggest problem. It was so cold that we had to wear heavy clothing all the time. The food was good, but the construction was poor. The buildings were not well insulated, and the windows were not well fitted.

Despite these difficulties, we managed to have a great time. The Norwegians were very friendly, and the food was excellent. We would definitely recommend a trip to Norway to anyone.

ON THE THEORY OF RELATIVITY

For some years I studied physics at school and university, and had been assiduously observing the wrong side of a clock. But when I made my first breakthrough in the theory of relativity, I was only a 23-year-old student. I had no idea what I was doing, but I knew I was doing it.

At the time, I was working on the problem of the electron, and I found that the equations of the classical theory were not consistent with the observed facts. I made a series of assumptions, from which I derived a number of important consequences. These equations, however, were not symmetrical, and this was a serious problem.

But then I had an epiphany. I realized that the equations could be made symmetrical by changing the notion of time. This led to the concept of relativity, which was later formalized in my famous paper, "On the Electrodynamics of Moving Bodies." I published this work in 1905, and it was immediately accepted by the scientific community.

I was then invited to lecture at the University of Göttingen, where I continued my research on the theory of relativity. I was also able to apply my theory to the problem of the photoelectric effect, which led to the development of quantum theory.

My work on the theory of relativity has had a profound impact on modern physics, and it has been widely recognized with numerous awards and honors. I was awarded the Nobel Prize in Physics in 1921, and I was elected a member of the Royal Society in 1905.

I have always been critical of the way in which my work has been presented to the public. I believe that the public should be educated about the importance of science in our lives, and I have been actively involved in promoting science education throughout my career.

I am now retired from active research, but I remain active in the scientific community. I continue to write and speak about science, and I am committed to ensuring that the next generation of scientists is well-informed and well-prepared.

I have always been passionate about science, and I believe that it is crucial to our future. I urge everyone to support science and to make sure that our children have the opportunity to learn about it.

BIG THINGS IN BOXING AND WRESTLING

Championships.

The Boxing and Wrestling Club will hold its usual championship in the

Mujah. This is set for a big night of action and a number of cards and attractions to be

但在。 However, the matches are being

Heads of the Boxing and Wrestling Club have decided to hold the event on Saturday, 13th

of the year.

FOOTBALL

The first quarter was our downfall. Kicking with a strong wind, we found

the ball, and our opponents' attack was not effective.

However, playing ordinarily in the second quarter, the Varsity team

shone. They pressed hard and scored three goals, despite a spirited defence by the

Leigh Street.

This was the only time the Varsity team had the upper hand in the game.

The game ended 3-3.

LACROSSE

As an interesting practice match was held on Saturday, the Varsity team

showed good team spirit and played a good game.

The Varsity team won by 1-0.

BASKETBALL

The Varsity team had a good practice match against the University team.

The Varsity team won by 1-0.

WOMEN'S HOCKEY

The Varsity team had a good practice match against the University team.

The Varsity team won by 1-0.

RUGBY

Both Varsity teams, composed in the same way as in the previous weeks, played

A good game.

The Varsity team won by 1-0.

The second half was played with great enthusiasm.

The final score was 20-10 in favor of the Varsity team.

SUPPORTING ADVERTISERS

TRAEUNIONS AND DEFENCE

Penally, for any one local students receiving military training, the

College will not interfere with their training, except in case of illness.

The College will pay all bills for the training and will require that any bills

be submitted to the College for approval.
