Procession Day Decision

Birchall, Haddrick Directing

At a special general meeting of students called by the S.R.C. and held on Friday, July 25, in the Ledy Symon, it was almost unanimously decided that a Procession Day should be held this year.

The tenor of all speeches was that to be a success the Procession must be one of high standard, and improvement on those held in previous years.

The President of the S.R.C., Neville Reid, who was in the chair, said that the following motion: "That the S.R.C. be directed to appoint a Director(s) who shall organize a Procession Day" be carried. He went on to outline the idea of a Procession Day and the need for a Director. He said, "If an object lesson (they) receives sufficient support from the student body, and if not to call a further consider of students." Haddrick/Birchall

He also read the following foreshadowed motion: "That this meeting urges the Director(s) of the Procession Day to bear in mind the necessity of maintaining the standard of Procession which is worthy of observation by University students." Haddrick/Birchall

In speaking to the Motion, Murray Haddrick said that the meeting had been called because with many others, he felt that the institution of the procession should not lapse without the general opinion of students being ascertained on the matter. He said that it was naturally in favor of a procession, though not without certain reservations. Is the first place it would be no use holding a procession similar to some of those which had been held previously. Also that the active support of a large number of students was essential if a procession worthy of University students was going to be conducted. He said that he was willing to undertake the organization of such a procession, providing he felt that he had the necessary cooperation of the student body.

Mr. Haddrick then went on to outline the idea of a Procession Day, that he had discussed with other students, and which had met with their approval. In the past, he said, there had been a feeling that something was lacking after the procession had been completed. To avoid a repetition of this feeling, he suggested that the Annual Men vs. Women Rugby Match, and possibly the Drinking Horn Ceremony, which had been conducted with success in previous years, should be held on the same afternoon; these festivities might be completed by the holding of an Adelphic Procession Dance in the evening.

In his reply, Mr. Haddrick reiterated that the success of a procession depended upon the willingness of each individual to spend a little time in procuring such things as trucks, etc., and thinking out witty and clever ideas. If the meeting was prepared to do this, he urged everyone to support the motion. BUT he strongly pointed out that if students were not prepared to undertake these responsibilities then they should vote against the motion. Mr. Birchall, speaking in support of Mr. Haddrick, said that last year it had not been desirable to hold a procession owing to the fact that the tragedy at the banks of the Torrens had occurred in the early part of the year. But this year there was no such reason why the annual procession of students should not be held.

Also Mr. Birchall said it was probably in the hands of the meeting whether a procession would ever be held again. If the motion were voted against the motion, it was extremely likely that the tradition of holding a annual procession of students would die out. He also pointed out that it was most desirable that students should preserve their right to after elections on current and international affairs. Mr. Birchall said he was quite willing to undertake with Mr. Haddrick the organization of a procession day this year, if the meeting so desired.

The meeting thereupon appointed Masala, Birchall and Haddrick, co-directors of the Procession Day, and directed them to obtain as soon as possible the assistance of the "By Counsil to conduct the procession through the streets of Adelaide." And should such permission be forthcoming the students were asked to stay back. But this is only a beginning! You must throw your weight behind whoever is organizing your faculty float; and give the co-directors all the support you possibly can, in order to make Procession Day, 1953, THE greatest.
Rhodes Scholarship

Closing date for applications for the 1953 Rhodes Scholarship is September 1, 1952. Application forms can be obtained from the Registrar (Secretary, State Selection Committee) and should be returned to him by the above date.

The following are the conditions of eligibility:

1. Candidates at the time of application must be of such age that they will have passed their nineteenth birthday and not the fiftieth birthday by October 1, 1953.

2. Candidates must be male British subject and unmarried. A Rhodes Scholarship is forfeited by marriage after the first year.

3. Candidates must have at least five years' domicile in Australia or New Zealand, and, by October 31, 1953, must have completed at least two years' study at a University in Australia or New Zealand.

4. Candidates may compete either in the State in which they have their ordinary domicile, home or residence, or in that in which they have received any considerable part of their education.

A. W. BAMPFORTH, Registrar.

BOOK REVIEW

Book VIII. Brysiewicz, J. F. Transmission tubes. This volume contains a comprehensive survey of the properties and applications of transmitting valves, with a detailed discussion of the types used to transmit the radio waves. The book is written in a clear and concise style, making it accessible to both beginners and experienced readers.

BOOK REVIEW

BOOK REVIEW

Book X. Jull, H. Manual for the illuminating engineer in large scale perfect diffusion. The aim of this book is to provide guidance for illuminating engineers on the design and installation of large-scale lighting systems. It covers the principles of lighting design and the selection of lighting equipment.

BOOK REVIEW

Book XI. Jull, H. Manual for the illuminating engineer in large scale perfect diffusion. This book is a valuable resource for engineers and designers working in the field of large-scale lighting systems. It provides practical guidance on the selection and installation of lighting equipment.

BOOK REVIEW

Book XII. Jull, H. Manual for the illuminating engineer in large scale perfect diffusion. This book is a comprehensive guide for engineers and designers working in the field of large-scale lighting systems. It covers the design, selection, and installation of lighting equipment.

A. U. D. S. Presentation

J. B. Priestley's "They Came to a City," to be performed in the Hut on Wednesday and Thursday night, will be the first A. U. D. S. production for this year and is also the choice for the 1952 Drama Festival held in Melbourne. It is unusual for a Drama Club to perform two A. U. D. S. productions in one year, but the enthusiasm and preparation of the members have been so high that the decision was made to add a second production.

The book was written by the late playwright J. B. Priestley, and the play is set in England. The story revolves around the life of a young couple in a city, and the themes of love, marriage, and the search for identity are explored. The production is directed by Mr. John Smith, and the cast consists of a diverse group of students. The set design and costumes are of high quality, and the actors deliver powerful performances.

"They Came to a City" is an interesting play, and the production will be a highlight of the Drama Festival. The A. U. D. S. members are to be congratulated on their hard work and dedication, and I am sure that the audience will be thoroughly entertained.

PHOENIX

It is regretted that the S.R.C. will be unable to publish "Phoenix" this year. This has been caused partly by shortage of funds, partly by lack of sufficient contributions, and parlyly by the low standard of the work submitted.

You—the students of the University—cannot be blamed for the failure of money, but something should be done about the other two causes. You have already done much this year, and another attempt will be made to produce a "Phoenix."
WINTER OLYMPICS
AT OSLO
(From Our Observer)

Oslo, the capital of Norway, with a population of 425,000, is situated at the head of a 62 mile fjord. On the coastal side it is encircled by wooded hills, and from these hills the city and fjord make one of the prettiest sights you can see. Nor- way is a fitting country in which the winter games should be held, as skiing, the most popular winter sport, eventuated in its modern form from Scandinavian districts of Norway. Sondre Norheim, a resident of Moshagen in Telemark, experimented carefully with skiing and found that by keeping the feet together instead of apart, and using a type of ski very much like that used today, a much greater speed and control could be gained. He introduced this new technique in Oslo in 1868 at a skiing championship, and the idea caused a sensation. People began to take more interest in skiing, and as this once game of boys was becoming a national pastime. Ski-jumping could now be practised with much skill, and today it is the Norwegians' main skiing delight. It is no wonder then that Holmenkollen, Norway's main jumping hill, is the most famous ski-jumping hill in the world.

Holmenkollen Hill was the scene of the Winter Games for 1952. The tower of the ski-jump has been built up so that the course now has 150 vertical feet to descend. Disturbing from the tower to the edge of the jump is 45 metres (approx. 150 feet) and the slope has an angle of 33 degrees. The full distance of the jump is 37 metres with a slope of 36 degrees, and the record jump is 71 metres. The stands and surrounding hills accommodate approximately 100,000 spectators; from the top of the spectator can see the jumper soaring through the air at a greater height than the stands.

Norway has been a very successful host and competitor. Nothing has been too much trouble for them, and they have won the respect of all present. From a financial viewpoint, however, the Games have not been a success. It was estimated that the Games cost the country between 13 and 14 million kroners (approx. £25,000.000). Much of the necessary money was raised on their new stadium, used for the opening and closing ceremonies, and the erection of the Olympic Village. These buildings cannot be expected to be paid for in gate-tickets and box seats, but they are a new asset to the community. On the other hand, the magni-

cent hot-dine course constructed of wood will not be held in the spring, and by next winter they will have nothing to show for the heavy expense of building it. These were many complaints made by local people against this expenditure. It is understood that a shortage of coal, and people have been doing a much more essential job in relieves such shortness. Other complaints came from people who had been put out of their homes by evictions and a lack of food for the accommodation of hungry tourists. But these deli-

cults had no effect on their hospitality to the tourists once they arrived. Everywhere one could hear praise for the Norwegian boys. The only complaints have been with Mother Nature. The sun shines nearly every day and the temperature was unusually high. In Oslo the weather was about 30°-50°, mild for Oslo and the con-

testants have been handicapped by a shortage of snow. Last year there was over 6 feet of snow in and around Oslo. This year it is less than 2 feet. Locals claim it is over 20 years since so little snow has fallen.

Although the admissions price to the Games were not as high as might be expected when the cost of running the Games is considered, the board charged at the Olympic Village, the officials, president and others, for transportation, has been rather expensive at 40 kroners (approx. 55 cents) per day. Colin Hickey, Australia's only representative in the ice- skating, won his heat in the 1000 metre, making good time - he found it cheaper to live in an hotel in Oslo.

The Australian team took part in its first Winter Games finding the cost of competing a very trying burden. It was believed to be the only team competing without either Government or public assistance, and because of the heavy cost of a trip to Europe, coupled with the loss of 500,000 kroners, all of our skiing champions were not able to attend. When approached by the team for financial assistance, the Government took the view that as Australians had already competed internationally before, it could not help them until they had, and only proved that they were capable of competing with other nations. This is quite a sound argument, but the result is that the team is not as strong as its immediate predecessors in lacking some of our champions in proving they are in world-class. Many Europeans expressed their concern at losing Australia's competitors in seeing Australian com-

ing. They realize that we have lost the facilities for winter sports of their kind, but believe that it is essential for the youth of as many nations as possible to be able to present a team to learn the art of skiing.

Providing we have a team which can perform satisfactorily, we should be there in future. It is to be hoped that the Government believes that they did perform satisfactorily. The position is admirably summed up by His Royal Highness, Crown Prince Olav, in his message of welcome:

"...it is our hope that the Australian team will be a manifestation of Peace and Goodwill, as on the 27th of October we are gathered here, the 27th of the month on which the truth of Christmas was told. It is so important to take part than to win..."
A Short, Short Story

(By a Student of Le Vie)

Professor Ethelton had been an acquaintance of mine for almost a year when he disclosed to me a theory, although at the time it seemed highly improbable, has had the most profound effects on my life. In fact, I do not think it would be an understatement to say that Professor Ethelton's theories have been the most influential in my life, and have earned him the respect and admiration of many. Indeed, those theories, which are based on the premise that all events in the universe are connected, have had a significant impact on my life. In fact, I find myself constantly referring to them and incorporating them into my daily life.

There are some people, no doubt, who are convinced that the theory of the interconnectedness of all events is nothing more than a figment of the imagination. But I believe that it is not only true, but that it is essential for us to understand the implications of such a theory in order to live a fulfilling life. For example, if we were to accept the idea that all events are connected, then we would be able to see the world in a new light. We would be able to understand that our actions have the power to shape the future, and that we have the ability to make a difference in the world.

One of the most significant implications of this theory is that it allows us to see the world as a whole, rather than as a collection of isolated events. This is because we can see that each event is connected to every other event, and that they all have the potential to affect one another. As a result, we are able to see that our actions have the power to shape the future, and that we have the ability to make a difference in the world.

I believe that it is essential for us to understand the implications of this theory in order to live a fulfilling life. For example, if we were to accept the idea that all events are connected, then we would be able to see the world in a new light. We would be able to understand that our actions have the power to shape the future, and that we have the ability to make a difference in the world.

DO MORALS CHANGE?

An article on the Natural Law seems to have a unique characteristic: there is a great deal of talk about the rights of the individual. If one reads the article, he will find that the author, Mr. Birkhead, is trying to argue that what is morally right or wrong is determined by the individual's own feelings. He states that a person's opinion on what is right and wrong is based on their personal experience and beliefs. He further suggests that the idea of collective morality is a concept that is outdated and no longer relevant in the modern world.

Mr. Birkhead believes that morality is subjective and that what is considered right or wrong is determined by the individual. He argues that the idea of a universal moral code is an outdated concept and that morality should be based on individual judgment. He suggests that the idea of collective morality is outdated and no longer relevant in the modern world.

Mr. Birkhead's argument is based on the idea that morality is subjective and that what is considered right or wrong is determined by the individual. He suggests that the idea of collective morality is outdated and no longer relevant in the modern world.
ONE APATHETIC

Dear Sir,—
Your article on student apathy in the "On Dit" has at last aroused my interest. I have always held the view that student apathy is a real problem, and I think it is time we did something about it.

I have been following the case of the "Naked Women Run Amok in Barr Smith," and the "Naked Women Run Amok in Barr Smith," and have been wondering what has happened to these two cases. I understand that they have not been reported on for some time, and I am wondering if you can find the time to report on them again.

Sincerely,

NICHOLAS WILLSON

NOT APATHETIC

Dear Sir,—
I should like to point out to the Editor of "On Dit" that the term "Barr Smith" could only be used as a term of abuse in the context of the situation. I do not agree with the Editor's statement that it is so.

The term "Barr Smith" is used in order that I may see that the necessary conditions are present and that the conditions of the school are met.

When these conditions are met, I shall see if the University is seeking truth, but once I have seen the University seeking truth, I shall see if the University is willing to listen to me.

Yours, etc.

GREGG MEANET

HORRORS!

Sir,—
I am writing this letter at the earnest request of several members of the Catholic branch of the University, and I feel that it is my duty to make known the facts in the fullest and clearest manner.

The, horror of the situation is such that even the most hardened heart would be moved to action. The facts are as follows:

A student, who had been working at the library, was found dead in the midnight hours. The body was found in the library, and the police were called immediately. The student had been working on a project for his thesis, and it is believed that he had been working late into the night.

The police have taken over the investigation, and they are hoping to have the case solved as soon as possible. The student was a member of the Catholic branch of the University, and many of his friends are in mourning.

Sincerely yours,

HENRY DENT

HEASLP AGAIN

Dear Sir,—
I should like to express my appreciation to the Editor of "On Dit" for his recent article on the "Barr Smith" case. It was a great help to many of us when we were trying to understand the situation.

The Editor's article was very clear and concise, and it helped us to see the situation in a new light. We were grateful for the explanation of the situation, and we feel that it will be of great help to others who are trying to understand the situation.

Sincerely yours,

FRANK BROWN

WE PATHETIC?

Dear Sir,—
I am writing to you to express my concern about the situation at the University. I have been noticing a growing apathy among the students, and I think that something should be done to address this problem.

It is my belief that the University should take a more proactive role in encouraging students to take more interest in their studies. I think that the University should consider setting up a system of rewards for students who achieve high grades, and that the University should also consider offering more opportunities for students to get involved in extracurricular activities.

Sincerely yours,

JOHN SMITH

PHILOSOPHY?

Dear Sir,—
I have read your articles on "On Dit," and I think that they are very interesting. I would like to hear your opinion on the following question:

"What is the meaning of life?"

I am interested in your thoughts on this topic, and I think that it would be helpful to have your perspective on it.

Sincerely yours,

LUCY JONES

NOT DISAPPOINTED EITHER!

Dear Sir,—
I am writing to say that I was not disappointed by the outcome of the student election. I think that the candidates were all good, and I think that the students made the right choice.

I am pleased with the result, and I think that it shows that the students are committed to making the University a better place.

Sincerely yours,

MRS. BROWN

CLUBS AND SOCIETIES

Liberal Comments

We are intrigued to see the latest Public Opinion Poll expressing dissatisfaction with the Federal Government. Remember that not so long ago Mr. J. A. G. Millen, then Assistant Treasurer, said that he expected to continue in the cabinet. South Australian Championships. We also expect to participate in the State Championships. A recent game saw the first team in the state against Largs Bay. We scored two goals and lost 2-0.

If people are really honest with themselves it will be a bit of a letdown to realize that if there was an election today there would be a lot of informal votes cast if there was an election to-day.

Some years ago William Waymouth ("Advertiser") told us that the opinion polls were not reliable. It is called the opinion game, but it seems to have a life of its own in Sydney. It is called the Sydney game, but it seems to have a life of its own in Sydney.

"CONCERNING the pre-requisite of the success of the Liberal Party, do not assume that the policy of the Liberal Party, do not assume that its policies alone are responsible for the success of the Liberal Party, do not assume that the policies alone are responsible for the success of the Liberal Party, do not assume that..."

L. F. Ethelston ("Advertiser")

Liberal Club

Malayan students from this University have been participating in the South East Asian Championship, which is a big event in the southeast Asian region. They have been performing very well and are expected to do well in the upcoming national competitions.

Badminton Club

The Badminton Club has been active in the recent games against nearby universities. The team is looking forward to the upcoming matches against other clubs.

Putum Society

The Putum Society has been organizing various events, including cultural workshops and lectures, to promote the culture and traditions of the Putum people. The society is planning to organize a larger event later this year.

Debating Club

The Debating Club has been active in participating in various debating competitions. They have been preparing for the upcoming national debating tournament, which is scheduled for the end of this month.

Letters to the Editor

(Continued from Page 6)

On the Mountain not to be taken too literally.

Fortunately we have a record of what was said, taken on a tape recorder. Mr. Reid was asking the question: "What do you think of Mr. Menzies?" He replied, "I say yes, twice not too often!"

In his answer, Mr. Reid said, "We are the people who are the people..."

In this context, the Prime Minister, Mr. Gough Whitlam, was referring to the "people of the Mountain" and the "people of the world." The Prime Minister's comments were a response to a question from a member of the audience at a public event.

W.S.R.

Without any blowing trumpets, the W.S.R. Appeal has been a success. The funds raised are to be used for various charitable causes in the community.

The W.S.R. Appeal is an annual campaign that raises funds for various charitable organizations. The campaign is supported by local businesses and organizations, and the funds raised are dedicated to helping those in need.

First World War

First World War

The First World War was fought from 1914 to 1918 and was a major conflict that affected many countries. The war resulted in significant loss of life and led to political changes in Europe.

Socialist Club

First Chinese film shown in Adelaide!

On Wednesday, August 6, at 8 p.m., the Socialist Club will present a screening of a Chinese film as part of its cultural program. The film is titled "Peach" and focuses on the life of a Chinese girl in a small village.

Special Notes

EVENING CONSIDERATIONS On Mondays, Wednesdays, and Thursdays, July 7, 10, 14, 16, 24, 26, and 28, 2000, provided for those unable to attend during the day. The meetings will be held in the Harry G. Davis Lecture Theatre, University of Adelaide.

PERSOINS NOT INCLUDED IN THE ABODE GROUPS will be considered by the University of Adelaide only voluntarily if they so desire.

## Great Aussie Rules Successes

Since the sensational one-point win over P.A.O.C. a few weeks ago, the University “A” team have won three games, lost none and seem assured of the Amateur League minor premiership, having a four-point lead over the second team—Alberton Church United.

Against the old rivals, Euston, the “A” showed a great improvement and won by 13 goals. Eveson defeated University in the first round, but this time there was no answer to the rough supremacy and speed of the Blacks. John Long and John Thomas scored well for Eveson, and Alberton Church, with Tom Bednall and Starkey, scored well for Eveson.

Wakalumpa were defeated by 9 points, but the University women played poorly for three quarters and well, 4 goals. Eveson was "impossible," and was then turned on a tear by Alberton Church, 9-6-4 and so ending defeat. Best forward for Eveson, in this match the A team, was Alberton Church, number 2, second on the list, and a game described as a preview of the final, the “A” team gave the players a preview of the team Alberton Church, with the main goal kickers, and Eveson were beaten by two points. The best point of the Blues at present is the defence, with Jim Whitfield, G. B. Fuller and Ian Northwood scoring up every other mark.

The University，“A” defeated Goodwood a couple of weeks ago, and to be scored in the semi-final by Railriders, 9 points, and Goodwood were 1 point lower in the semi-final. Eight points, 1 point, were the main goal kickers, and Goodwood were beaten in the semi-final. If the same pattern is maintained in the semi-final, then the “A” team will be a good deal easier.

On October 5, the University Football Club held its annual Christmas Ball at the Alberton Church Hotel on August 11. The event was well attended, and the revenue from the event largely covered the club’s expenses for the year.

## Rugby Report

On Friday last the Rugby Club held an extraordinary dinner in honor of the departure (in case you wish) of the 1951 Rhodes Scholar, Mr. J. Ashwin, B.A.

The chairman, Professor Portus, in introducing the captain, Mr. W. W. Hoge, E.S., said in his speech: "The fact that you are leaving us all in a state of great distress. However, it is not long before the whole will be restored to their normal state. Fortunately, he is no less than 1000 miles away and we shall be able to breathe freely." The rugby team also contributed to the proceedings by singing "God Save the King!"

The University team, which included A. E. James, F. J. Black, and J. A. Green, played well against Woodville, but lost 15-10. Despite this, the team continued to perform well throughout the season.

---

## Hockey Uplift

"Support from sidelines (singing morals)."

On July 19, the University "A" team pulled up their suspenders and played the best game of the season against the University "A" team. The "B" team lost the match, but played well. The University "A" team played well in the second half and won the game 1-0. The "B" team was led by captain Jack Smith, and the "A" team by captain Tom Brown.

Our two other overseas players, Dr. John and Martin were outstanding, while Tracey justified his promotion to the team.

---

## More Successes

It only remains to apply for new, stricter "unanimous" rules for the game.

The Hockey Club annual dinner was held on July 25 in the Lady Reynold’s Hotel. The event was a great success. A total of 100 people were present, and the auction was well attended, raising a significant amount of money.

Many thanks to the parents and supporters of the players for their contribution to the club.

Announcing the next game, the University "A" team will play against the University "B" team at the University Grounds on August 15.
