FLORA AND FAUNA OF PFL.
Dr. W. G. Wooldridge, formerly of Adelaide University, with Mr. E. J. Goddard, of the Adelaide Museum, has recently returned from a second exploration of Pflug, under the auspices of the Royal South Australian Society. They acquired a large amount of valuable and interesting information for the coming exhibition of the society, and formed the basis of the exposition, referring to the results of their studies. The enormous range of the Flora and Fauna of Pflug has been reduced to about 200 species, including many rare and exotic forms of vegetation. The majority of the forests and woodland have been transformed into shrubland, due to the severe drought and the encroachment of the musk. The musk, introduced some years ago from Java, has become quite rampant, and even the evergreens are beginning to look quite bare.

EXAMINATION FOR THE A.B. DEGREE.
(Examination in Museum.)
March 1905.

Eldred Conservatorium.

ELDER CONSERVATORIUM.

Dr. Jenkins' Examinations Address.
The professional work at the Adelaide University is being conducted under the auspices of the Elder Conservatorium. Mr. J. A. Jenkins delivered the inaugural address at the Elder Conservatorium on Wednesday afternoon. Dr. Jenkins extended a welcome to the new students and expressed his hope that they would benefit from the opportunities offered by the Conservatorium. He emphasized the importance of discipline and hard work in the study of music, and stressed the need for students to take full advantage of the facilities provided by the Conservatorium. The examination results for the past year were read out, and Dr. Jenkins congratulated the students on their achievements. He urged them to continue their studies and to make the most of the opportunities offered by the Conservatorium.
