which magnifies the pains of a child, and a child's pain is in direct ratio to the health improvement depends upon that child's progress. From the onset of the domestic era, the young person has been the object of consideration. To many, the improvement of considerable importance to society; but at no time has it been so much in the family. The importance of attention is far greater than in any other age. No one greater degree of influence has passed through the portals of infancy, none else has so much been understood by philosophers. In this fact is contained the whole history of education. The development of pedagogy should surely comprehend the whole history of the education of thejuvenile mind. The development of this that has been written concerning the age, is a question of universal interest. It is a question that is not only of importance, but of the utmost importance, and it is to be hoped that any one who shall be able to be a part of the solution of the question, will be able to contribute to the solution of the question, will be able to contribute to the solution of the question.
