THE ELECTION.  

WHAT IS RADIUM?  

THE LATEST MARVEL.  

Professor Bragg gave the first of a series of lectures on "Radium" in the electrician on Tuesday evening. Continuing his ex- planation of the properties of the electron, he dealt with the effect which it produces on other substances and the way in which an electric charge is transferred. This talk was followed by a demonstration of the X-rays, and many interesting photographs were shown. The lecture was given in cooperation with several other lecturers, and the audience was large.

THE LECTURE AND CONCERT AT THE NURSE'S HOMESTAY.  

On Wednesday evening Professor Henderson delivered a paper on "the value of music and art in health" at the University. He was cordially received by the audience, who were much interested in the subject. The lecturer said that music and art were essential in the treatment of disease, and that they should be more widely used in hospitals. The concert which followed was of the highest quality, and the audience was greatly pleased.

ATHLETICS IN EDUCATION.  

In an admirable lecture in the Elder Hall on Wednesday morning, Professor Henderson spoke of the value of athletics as a means of education. He said that athleticism might be carried to excess, and that the man who took part in the football field and relied on speed was not the ideal athlete. He emphasized the importance of speed, endurance, and strength, and the need for a well-rounded education. The lecturer also spoke of the relationship between athletics and the study of science, and of the value of athletics in the social life of the university. The audience was greatly interested in the lecture, and there was a general feeling of enthusiasm for the subject.

PIONEERING AND COMMERCE.  

"The last of the pioneer pioniers," said Professor Henderson on Wednesday evening. "The last of the pioneers" was a series of lectures given by the professor on the history of industrial development. He traced the progress of industry from its earliest beginnings to the present day, and showed how it has been influenced by social and economic factors. The lecturer emphasized the importance of education in the development of industry, and the need for a well-rounded education in order to meet the challenges of the future.
