TECHNICAL EDUCATION. At a meeting of the University Senate on Wednesday afternoon, Professor Iggles, explaining the reasons for the revision of the degree and of the School of Science with references to the study of the advanced technical education in the country, announced that every effort should be made on the advancement of technical education. He stated that one of the most important ways of accomplishing this object was by means of a technical college, in which every effort should be made to prepare a sound and well-organized system of education for the higher branches of the subject.

Dr. W. J. Walker, after a long and dry talk, got up to make a short speech on the subject of education. His speech was more of a long and dry talk, and he was not allowed to make it.
