MATRICULATION.

THE NOVEMBER EXAMINATION.
DETAILS AND ANALYSIS OF RESULTS.

As supplementary to the list of successful candidates published in our last issue, the usual tabulated statements are appended, showing:—
1. The number of candidates who presented themselves in the several subjects.
2. The number of candidates who passed.
3. The number of candidates who failed.
4. The number of candidates who obtained honours in each of the several subjects.
5. The percentage of failures in each of the separate subjects.

* Including those obtaining honours.
† In these subjects pass papers only were set.
From the above figures it will be seen that out of the total number of candidates entered for all the subjects of examination, viz., 6,151, the number who failed was 2,200, or 35.78 per cent. The latter number being taken as the average percentage of failures in the several subjects, it will be seen at a glance in which subjects the percentage of failures falls below or exceeds the average.
The total number of candidates who entered for this examination was 964. Of this number five candidates absented themselves from the whole examination, and 129 entered for less subjects than which entitle them on passing therein to matriculate. Deducting these numbers, 5 + 129 = 134, from the total number of candidates, viz., 964, it leaves a total of 830 who attempted to pass the whole examination. Of this number, 351, or 42.28 per cent., were successful.

The following is a carefully-compiled return showing the numbers of the successful candidates, and also of those who obtained honours in the several subjects of examination. Candidates will thus be enabled to see their complete returns without paying a special visit to the University.
