CHAPTER 6
QUALITATIVE ANALYSIS (PART II) – INFLUENCES ON THE INTERNATIONALISATION OF FAMILY FIRMS
6.1 INTRODUCTION
6.2 COMMITMENT TOWARDS INTERNATIONALISATION
   6.2.1 Vision and objectives
   6.2.2 Long-term orientation
   6.2.3 Financial performance
   6.2.4 Production capacity
   6.2.5 Succession a trigger for organisation change
6.3 FINANCIAL RESOURCES
   6.3.1 Availability of financial resources
   6.3.2 Committing financial resources
6.4 HUMAN RESOURCES
   6.4.1 Entrepreneurial orientation of family leaders
   6.4.2 Knowledge, experience and expertise of executive management team
   6.4.3 Valuable role of outsiders
   6.4.4 Relational abilities of family members
6.5 PHYSICAL RESOURCES
   6.5.1 Changes to production infrastructure
   6.5.2 Production capabilities required for internationalisation
   6.5.3 Information technology resources
   6.5.4 Geographical location
6.6 ORGANISATIONAL RESOURCES
   6.6.1 Network relationships
   6.6.2 Managerial capabilities
   6.6.3 Marketing capabilities
6.7 CONCLUSIONS

CHAPTER 7
INTEGRATED FINDINGS, CONCLUSIONS AND IMPLICATIONS
7.1 INTRODUCTION
7.2 RESEARCH ISSUE #1: THE PROPENSITY FOR AND DEGREE OF INTERNATIONALISATION OF SMFES
7.3 RESEARCH ISSUE #2: THE EFFECT OF INTERNATIONALISATION ON SMFES
   7.3.1 Financial outcomes
   7.3.2 Non-financial outcomes
7.4 RESEARCH ISSUE #3: THE INTERNATIONALISATION BEHAVIOUR OF SMFES
7.5 RESEARCH ISSUE #4: INFLUENCES ON THE INTERNATIONALISATION OF SMFES
   7.5.1 Commitment to internationalisation
   7.5.2 Financial resources
   7.5.3 Human resources
   7.5.4 Physical resources
   7.5.5 Organisational resources
7.6 AN INTEGRATED MODEL OF THE INTERNATIONALISATION OF SMFES
7.7 IMPLICATIONS FOR THEORY
7.8 IMPLICATIONS FOR POLICY AND PRACTICE
   7.8.1 Implications for SMFES

Abstract

In recent years, the Australian government has opened the Australian economy to the global marketplace through tariff reductions and the establishment of free trade agreements with other countries. The ability of the Australian economy to benefit from these agreements is dependent on Australian businesses identifying international opportunities and exploiting their competitive advantage in the international marketplace. However, the family business literature suggests that complexities unique to family firms limit their ability to take advantage of such opportunities and grow internationally. To date, the limited empirical testing of such claims has produced conflicting results. As a consequence, little is known about the international behaviour of family firms, what influences such behaviour and what effect internationalisation has on the owning family and the business.

This study addresses this gap in the literature by using a mixed research method design. Using the quantitative analysis of small-to-medium-sized family-owned enterprises (SMFEs) contained within the most recently available longitudinal database of Australian businesses and the qualitative analysis of eight SMFEs, the internationalisation process of SMFEs in the manufacturing sector was examined.

The findings of this study suggest that, compared to their non-family counterparts, Australian SMFEs are less likely to venture into the international marketplace. Furthermore, those that do, do so to a lesser degree when compared to non-SMFEs. Although the internationalisation behaviour of most SMFEs was similar to that of traditional international firms, some exhibited ‘born-again’ global internationalisation behaviour as a result of critical events within the firm. These included succession to the next generation and the appointment of non-family managers with the requisite expertise. The internationalisation of SMFEs was dependent on their ability to configure their resources to create globally relevant capabilities, and their willingness to exploit those capabilities in the international marketplace. In addition to the family’s commitment to internationalisation, the production capabilities, international network relationships and overcoming a ‘production mindset’ to build the requisite managerial and marketing capabilities were all found to be critical to the international growth of SMFEs. An SMFE’s financial and human resources were found to have a substantial influence over their ability to build the organisational capabilities and international network relationships required for internationalisation.
Compared to solely focusing on the domestic marketplace, there were some financial benefits to be gained by SMFEs in venturing overseas. However the extent to which they did so had no observable effect on financial performance. Overall, the financial benefits gained from internationalisation were dependent on having a long-term commitment to, and possessing the managerial capabilities required for, internationalisation. The changes brought about by internationalisation improved the overall competitiveness of SMFEs, enabling them to successfully compete with their domestic and international competitors. However, internationalisation was found to place substantial strain on the family unit, particularly when the firm had limited managerial capabilities, and was often a trigger for conflict within the family and the business. The implications of this study’s findings for SMFEs, policy and future research are explored in the thesis.
Statement of declaration

This thesis contains no material which has been accepted for the award of any other degree or diploma in any university or other tertiary institution and, to the best of my knowledge and belief, contains no material previously published or written by another person, except where due reference has been made in the text.

I give consent to this copy of my thesis being made available in the University Library.

The author acknowledges that copyright of published works contained within this thesis (as listed on the next page) resides with the copyright holders of those works.

Acknowledgements

The PhD process has been challenging but rewarding journey and learning curve, which would not have been possible without the support of a number of people.

First and foremost, words cannot express how appreciative I am of my wife, Rebecca, and son, Samuel, for their encouragement, patience and sacrifices made during the ‘Tour de PhD’. My parents, Ray and Anne, and my in-laws, T.C. and Keryn, have also supported and encouraged me in countless ways during the ‘tour’, as have many friends – especially the ‘Scumbags’.

I am indebted to my supervisor, Dr. Jill Thomas, for her astute intellectual guidance, hospitality and friendship throughout the last four years. Special thanks to Dr. Bruce Gurd for his insightful advice during critical stages of the PhD process. Thanks also to the staff of the Adelaide Graduate School of Business for their support during my candidature.

This research would not have been possible without the willingness of the eight family businesses and others to participate in the study. During the PhD journey I have met a number of inspirational family business leaders, through whom I have become aware of the significant contribution that Australian family businesses make to Australia’s economic and social fabric.

The Australian Bureau of Statistics permitting access to the confidentialised BLS, and the financial assistance provided by the Australian Research Council and the South Australian Chapter of Family Business Australia, are gratefully acknowledged. The assistance provided by Chris Johnston (former chairman of FBA[SA]) and Alan Reddrop (Department of Trade and Economic Development) in various aspects of the study is also acknowledged.

Final thanks for the ongoing prayers and support of my friends at Unley Park Baptist Church. To God be the glory.
