PAPERS SUBMITTED FOR THE D.Sc. DEGREE

by

Joseph Garnett Wood

Doctor of Science (D.Sc.)

1934

Please note: These pages created as the doctorate lacks a title page and table of contents

TABLE OF CONTENTS

Volume 1.

The flora and fauna of Nuyts Archipelago and the Investigator Group, no. 8 : The ecology of Pearson Islands / by T.G.B. Osborn, J.G. Wood. 22 p. (reprinted from: Transactions of the Royal Society of South Australia, v. 47 (1923))

On the zonation of the vegetation in the Port Wakefield district, with special reference to the salinity of the soil / by T.G.B. Osborn, J.G. Wood. 11 p. (reprinted from: Transactions of the Royal Society of South Australia, v. 47 (1923))

On some halophytic plant communities in arid South Australia / by T.G.B. Osborn, J.G. Wood. 12 p. (reprinted from: Transactions of the Royal Society of South Australia, v. 47 (1923))

Floristics and ecology of the mallee. 35 p. (reprinted from: Transactions of the Royal Society of South Australia, v. 54 (1930))

On the autecology of *Stipa nitida* : a study of a fodder grass in arid Australia / by T.G.B. Osborn, J.G. Wood and T.B. Paltridge. 26 p. (reprinted from: Proceedings of the Linnean Society of New South Australia, v. 56 (1931))

On the growth and reaction to grazing of the perennial salt bush, *Atriplex vesicarium* : an ecological study of the biotic factor / by T.G.B. Osborn, J.G. Wood and T.B. Paltridge. 26 p. (reprinted from: Proceedings of the Linnean Society of New South Australia, v. 57 (1932))

On transpiration in the field of some plants from the arid portions of South Australia with notes on their physiological anatomy. 20 p. (reprinted from: Transactions of the Royal Society of South Australia, v. 47 (1923))

The relations between distribution, structure, and transpiration of arid South Australian plants. 10 p. (reprinted from: Transactions of the Royal Society of South Australia, v. 48 (1924))

The selective absorption of chlorine ions, and the absorption of water by the leaves in the genus *Atriplex* 14 p. (reprinted from: The Australian journal of experimental biology and medical science, v. 2 (1925))

The physiology of xerophytism in Australian plants, pts.1-2. 6, 12 p. (reprinted from: The journal of ecology, v. 12 (1934))

The relation between water content and amount of photosynthesis 5 p. (reprinted from: The Australian journal of experimental biology and medical science, v. 6 (1929))

Physiological derangements in vines subsequent to injury by cold, 12 p. (reprinted from: The Australian journal of experimental biology and medical science, v. 6 (1929))

An analysis of the vegetation of Kangaroo Island and the adjacent peninsulas, 34p. (reprinted from: Transactions of the Royal Society of South Australia, v. 54 (1930))

The physiology of Xerophytism in Australian plants: carbohydrate metabolism of plants with Tomentose succulent leaves, 7p. (reprinted from: The Australian journal of experimental biology and medical science, v. 10 (1932))

The physiology of Xerophytism in Australian plants: carbohydrate changes in the leaves of Sclerophyll plants, 12p. (reprinted from: The Australian journal of experimental biology and medical science, v. 11 (1933))

Volume 2.

The vegetation of South Australia

Volume 3.

Time factors in photosynthesis

THE VEGETATION OF SOUTH AUSTRALIA.

Chapters FOUR to EIGHT.

by J. G. WOOD.

TIME FACTORS IN PHOTOSYNTHESIS.

by J. G. WOOD.

SUMMARY

A collection of 17 reprinted papers from various journals of the author's publications. Also includes manuscript copies of chapters 4-8 of "The vegetation of South Australia" (published Adelaide : Govt. Printer, 1937); and "Time factors in photosynthesis". These papers have all been submitted as the author's Doctor of Science thesis.
