ACIDOSIS AND ALKALOSIS:

Their Relation to Practical Medicine.

Thesis submitted for Degree of M.D., University of Adelaide.

June, 1920.

Albert Ray Southwood, M.B.,B.S.
Table of Contents

1. Section 1
   The Laboratory: an Essential to Medical Progress

2. Section 2
   The Physiological Balance between Acids and Bases

3. Section 3
   Metabolism and the Acid-Base Equilibrium

4. Section 4
   Regulating Mechanism of the Acid-Base Equilibrium

5. Section 5
   Methods of Examination

6. Section 6
   The Clinical Importance of the Acid-Base Equilibrium

7. Section 7
   Acidosis and the Organs of Internal Secretion

8. Section 8
   Resume

Bibliography

Appendix
Illustrative tables selected from results of practical laboratory and clinical work done in connection with this study
