SOUTHWARD HO!

MAWSON EXPEDITION.

SYDNEY, January 15.

The Australasian Association for the Advancement of Science included its thirteenth session on Saturday. It adopted motions strongly urging the establishment of magnetic stations at Perth and Port Darwin to supplement the magnetometer work of the Melbourne Observatory. It was agreed to appoint a committee consisting of Messrs. Watson, Warren, and Babington, to correspond with the International Commission for the collection and annual publication of data determinations of physical, chemical, and biological, and engineering constants.

The opinion was expressed that the government bodies of the Public Libraries in Sydney, Melbourne, Adelaide, Brisbane, and Perth, should communicate with the Secretary of State for the Colonies asking that duplication of the documents which passed between the Governments of the colonies and the secretaries of the state until such a time as the Secretary of State should be placed under their charge. The resolutions passed by the anthropological and physiological sections were passed with reference to the advisability of adopting a uniform method of spelling Australian place names, and that an organized scheme for the future of Australian anthropology should be formulated and submitted for the consideration of the Federal and State Governments. The recommendations of the sanitary and horticultural sections were also received.

SYDNEY, January 15.

The Australian Association for the Advancement of Science held its thirteenth session yesterday. The closing session of the council reserved a special place in importance among the business matters of the association, a resolution approving a vote of £2,000 representing a payment of £2,000 towards the expenses of the expedition to be made available without further delay, or to be made available for research work. The resolution was carried, and the committee was instructed to appropriate the £2,000 for the purpose.

The President (Professor Mawson) submitted a general report of a proposal that the association should be associated with Dr. Mawson's Antarctic expedition and pay £2,000 towards the expenses of the expedition. The resolution was carried, and the committee was instructed to appropriate the £2,000 for the purpose.

The association also decided to support the Mawson expedition in the subcontinent of Australia by a contribution of £2,000. The committee was instructed to appropriate the £2,000 for the purpose.
