MUSIC TEACHERS’ ASSOCIATION.

LECTURE BY PROFESSOR KERR

The thirteenth general meeting of the South Australian Music Teachers’ Association was held on Monday evening in the Prince of Wales Theatre, Adelaide University. Dr. Harold Davies presided over a good attendance. Five new members were elected, and several nominations were received. It was decided that the name of the Society should be changed to the more descriptive “Educationalists’ Association of South Australia,” with the object of including all those interested in educational matters. The proposition was carried unanimously. The formal resolutions were also carried, and the meeting adjourned.

TO THE SOUTH LAND.

DR. MAWSON INTERVIEWED.

Sydney, June 13.

Among the passengers on the R.M.S. Mactura, which arrived from Vancouver today, was Dr. Douglas Mawson, a member of the recent Shackleton Antarctic Expedition. He has just concluded a sea voyage from Hobart, and in a few days will return to Adelaide to take up his duties as lecturer on geology at the University. The doctor has been in New Zealand for more than a year, and he has been in the Antarctic for about the same length of time.

The expedition was an exploration of the remote unknown coast of the Antarctic, and it is expected that the results of the work will be of great value to science. The expedition was equipped with the latest scientific instruments, and the work was carried on under the personal supervision of Dr. Mawson.

In his interview, the doctor said:

“I have been in the Antarctic for nearly a year, and I have seen some of the most beautiful scenery in the world. The icebergs are magnificent, and the glaciers are a sight to behold. The doctor has also been interested in the work of the scientific team, and he has been involved in various experiments and observations. He has been particularly interested in the study of the history and geology of the region, and he has made several important discoveries in this field.

The expedition has been very successful, and the doctor is confident that the work will be of great value to science. He is looking forward to returning to Adelaide to continue his work at the University.

PROPOSED VISIT TO AUSTRALIA.

FEDERAL ADVISORY SOUGHT.

On Wednesday afternoon representatives of the South Australian branch of the Australian Council for the Advancement of Science visited the Prime Minister to discuss the possibility of a Federal Advisory Mission to Australia for Federal assistance in arranging for the establishment of a new research body, the “Australian Institute for Scientific Research.”

The Commonwealth was represented by Dr. Douglas Mawson, a member of the recent Shackleton Antarctic Expedition. He has just concluded a sea voyage from Hobart, and in a few days will return to Adelaide to take up his duties as lecturer on geology at the University. The doctor has been in New Zealand for more than a year, and he has been in the Antarctic for about the same length of time.

PROPOSED VISIT TO AUSTRALIA.

FEDERAL ADVISORY SOUGHT.

On Wednesday afternoon representatives of the South Australian branch of the Australian Council for the Advancement of Science visited the Prime Minister to discuss the possibility of a Federal Advisory Mission to Australia for Federal assistance in arranging for the establishment of a new research body, the “Australian Institute for Scientific Research.”

The Commonwealth was important enough to satisfy the prime minister. It had no idea that he had had a conference of the Associated Chambers of Commerce of the Commonwealth and Australia for the Scientific Congress would have as personal a result as it was only reasonable to expect that the Commonwealth would be interested in the establishment of a new research body. The conference was purely the discussion of information, and there was no indication that the whole of the scientific research of Australia, and they were pleased to see that the conference had been a contribution of £100,000 for the object referred to.

Professor E. C. Stirling said that the conference had been a great success, and that it had been a pleasure to be present. He had been associated with the work of the conference, and he had been very much interested in the discussions that had taken place. The discussions had been very fruitful, and he had been very pleased with the result.

In his interview, the doctor said:
