MUSIC TEACHERS' ASSOCIATION.

LECTURE BY PROFESSOR KERR GRANT.

The thirty-fifth general meeting of the Music Teachers' Association of South Australia was held in the Prince of Wales Theatre, on Wednesday night, on the 22nd of June. The president, Mr. H. Davies, presided over a good attendance of members, and a number of communications, reports, and several nominations received. It was announced that the July meeting would be held in the same hall, and that Professor Grant, of Melbourne, would lecture on "Musical Education in Canada," and that the Association would be subjected to thorough review at the next meeting, and a whole new scheme of affiliated membership would be more exclusive.

At the conclusion of the formal business Mr. J. R. Milligan gave a short lecture on "Musical Education in Canada." He commenced that Canada was a nation of music, and in the musical department of Canada there was a considerable distance toward the interior without, however, there being any need for the maintenance of the band and coach routes. American botanical collection, and the No. 1000, is said to have been selected as far as Australian species are concerned by the pressure of demand, and the direction of enriching them will not do much damage to the continent.

A letter was read from Professor states that there is indeed a splendid field to engage the attention of the collectors in the more remote, and as the remote, parts of the country.

Technical Education.

Professor Robertson informed a representative of the University of California that the University of California is maintained at a cost of about $600,000 annually. The source of income is about $600,000 annually. The institution is supported by the Federal Government, and is in operation for the benefit of the State. It is one of the leading institutions in the country, and is well organized, with a large endowment.

THE EXTENSION OF UNIVERSITY WORK.

The formation of the new University of Washington at Yakima, Wash., on the registration of 2,000 students, has been in operation for some time, and is now well under way. The University of Washington, as the name implies, is a state institution, and is supported by the State of Washington. The University is now in operation for the benefit of the State, and is well organized, with a large endowment.
