SCHOOL WIRELESS: Adelaide Won Easily.

REAR INDUSTRY: A STORMY PASSAGE.

Bank, Norwood School, with 459 contributors, has the honor of being the largest depositors' association in South Australia.

Comparison of the expenditure on primary schools for 1908 with that of 1909 shows an increase of £3,922. This is accounted for mainly by the purchase of secondary schools. The schools of Millicent, Millicent, Riverton, and Victor Harbor have been supplied with wireless sets.

It is hoped that during the coming year, with the help of the state government, the remaining schools will be equipped with wireless sets.

The new wireless sets will enable the schools to receive broadcasts from Adelaide, Sydney, Melbourne, and other centers.

In conclusion, it can be said that the introduction of wireless into the schools of South Australia is a progressive step towards the better education of the youth of our State.
