The MAWSON EXPEDITION

INVITATION TO A NEW ZEALAND GEOLOGIST

Wellington, October 22

Mr. Speight, assistant curator of the Canterbury Museum and lecleeer in the Wellington Technical School, has been offered the leadership of the party which Dr. Maussoy intends to establish at Macquarie Islands. Mr. Speight feels he will be unable to accept the offer, as his arrangements now made will enable him to spend a few months in Macquarie, leaving New Zealand perhaps towards the end of next year.

Splendid Agricultural Work

which is now being carried out in that country. Mr. Speight was appointed for the position of Bishop, and he is well qualified for the work. He is the first Bishop in Australia to work amongst the older agriculturalists at the time arranged for our visit to Cambridge.

The new Bishop, and especially the wheat-growing farms, appears to me the most interesting. I am greatly interested in wheat, as it is a land of small farms, and we cannot afford to overlook the great efforts that have been made to reduce the cost of production. I am therefore glad to see the progress that has been made in this direction.

Mr. Speight was the first to bring attention to the fact that the new Bishop, and especially the wheat-growing farms, appears to me the most interesting. I am greatly interested in wheat, as it is a land of small farms, and we cannot afford to overlook the great efforts that have been made to reduce the cost of production. I am therefore glad to see the progress that has been made in this direction.
