When the Government discontinued the South Australian scholarship of £200, the Melbourne University, in order to enable the full medical curriculum to be provided, adopted a policy of government aid. The number of students in this University amounted to 250, and the cost of teaching and living was £200,000 per annum. The Melbourne University had been granted £150,000 for special objects, and the government had made no grant. The situation was that the Melbourne University had to raise £150,000 per annum for itself. The Melbourne University was in a free and independent position, and the government had made no grant for this purpose.
THE UNIVERSITY.

ALTERING THE REGULATIONS.

A CONTESTING the alterations of the regulations brought before the Senate yesterday afternoon, several members of the Senate present were marked. Mr. T. A. Catony, the Presiding Officer, after consideration of the matter, declared the business upon vacanices. The Senate then adjourned.

Harley Student.

The House of the Senate, which is in the state of prohibition, Fielder is the subject of the motion. The Vice-Chancellor was addressed by the Minister for Education, Mr. J. P. Colman. The Speaker then informed the Senate that the House of the Senate had been visited by the House of Commons. The mover and debate took place on the subject of the motion. The House of the Senate then adjourned.

Angus Engineering Exhibitions.

On the motion of Professor Chapman, the House was adjourned for the day. The House of the Senate then adjourned for the day.

The Medical Course.

Dr. Birkington was moved, as approved by the committee, that the present system of medical training should be abolished. The committee recommended that the duration of training should be at least six years, and that the training should include practical work. The committee also recommended that the training should include a course of lectures, and that the training should be supervised by a committee of medical practitioners. The committee further recommended that the training should include a course of practical work, and that the training should be supervised by a committee of medical practitioners.

Public Examinations.

The regulations were amended to meet the new conditions required for the examination of candidates for the Degree of Bachelor of Medicine. The examination will be held in three parts: Part I, consisting of a written examination; Part II, consisting of an oral examination; and Part III, consisting of the practical examination.
