Dr. MAWSON'S EXPEDITION.

Dr. Douglas Mawson, who has been a prominent English geologist, returned from the southern hemisphere after a successful expedition to the Antarctic. He has been appointed to the office of the Secretary of the British Empire and has been offered the position of the Director of the National Museum of Victoria. He has accepted the position and has been working on the collection of specimens from the Antarctic. The expedition was a great success, and Dr. Mawson is expected to make an important contribution to the science of geology.

Preparations for the Voyage.

Dr. Mawson has returned to Australia and is preparing for the voyage to the Antarctic. The expedition is expected to arrive in the southern hemisphere in the spring, and Dr. Mawson is working on the collection of specimens from the Antarctic. He has been appointed to the office of the Secretary of the British Empire and has been offered the position of the Director of the National Museum of Victoria. He has accepted the position and has been working on the collection of specimens from the Antarctic. The expedition was a great success, and Dr. Mawson is expected to make an important contribution to the science of geology.

Professor Ewing and Mr. J. G. Reimann, of Adelaide, and Mr. W. A. Laver, of Melbourne, have been appointed to the Adelaide University examiners in practice of music at the forthcoming examinations.

At a meeting of the Council of Adelaide University, on Friday, the report was read from the Royal College of Music, discussing the proposal of the Conservatorium of Music for the introduction of a new course in the arts of the University. The report was approved, and the council resolved to order that the report be referred to Miss Kleinschmidt's work and to the conservatorium of music for the same purpose. The council also decided to order that the scholarship be extended for one year in the case of those who had been elected to the scholarship.
