and notably Mr. Richard Correll, the father of Mr. F. E. Correll, who returned from the Antarctic with his party, having been aboard the Aurora. Mr. R. C. Hodge (re- gistrar), and Mr. F. A. Robertson (Dr. Hodge's brother) were also prominent in the scene, the representation of the University, and later Professor Chapman ar- rived. Mr. T. Ryan was one of the com- mittee of the Richmond Club, and Captain Arron, a prominent figure in the little gallery, and the passengers waiting for the arrival of the vessels. As the Aurora was at the dock, and the press representatives had already boarded, she was unable to spare time for an interview, but made an appointment to meet the representative of "The Advertiser" at the Continental Hotel that night. He clambered over the side just as a dog shot from the deck, a shot that was with diffi- culty brought to an end by a member of the party.

Cabled to London.

Dr. Mawson explained that the more important news of the operations of the expedition was to be cabled to London before it would be available to the Aus- tralian press.

Aurora Off to the Port.

The Aurora went on her way to Port Adelaide, and Dr. Mawson came ashore in the Customs launch. He was wel- comed by the president of the South Australian Geographical Society, Mr. A. W. Piper (who was president at the time); Mr. G. F. Moore (vice-president); and Mr. H. R. Hoare (vice-president). He was motored to town.

Dr. MAWSON INTER- VIEWED.

A MARVELLOUS ESCAPE.

WONDERS OF THE ANTARCTIC.

STRANGE DENIZENS OF THE SEA.

GALES THAT WOULD DEMOLISH ADELAIDE.

Dressed in cool summer clothes, with tangled, spring-like hair, Mr. Mawson seemed to have returned from civilisation to a bound when he met a representative of "The Advertiser" by appointment at the South Australian Hotel last night. He said that his face bore indelible marks of hard- ship, fatigue, and bitter experiences, the exhaustion of the long journey, the loss of another man of good breeding and education whom one encountered in the hotel. He was pleased to see the pressman, but he said, and his tone was rather poor: 'I don't think they have anything to wear them for their journeys, and they take their peaked caps upon that bridge.

Boarding.

The Aurora was soon alongside, and Captain Richardson clambered aboard. Mr. Hodge, who was the most active of the party, was a little excited, but it was not apparent that she had a slight list to port, a fact that added to the excitement. She was lying to the wind, and the motion of the vessel was well noticeable. The Aurora was at the dock, and the press representatives had already boarded the Aurora prepara- tion to come to a halt.
