The Dean of the Faculty of Science presented medals and prizes for degrees in science and in engineering, and those who have obtained degrees in these faculties. The Chancellor presented medals and prizes for degrees in science (all common grades) and in engineering for the year 1913 to the students of the University of Sydney (London): for the honors degree of bachelor of science, chemistry, Alfred Freeman, with the highest marks; for the degree of bachelor of scientific research, George Hugh McDonald; for the degree of bachelor of science, Robert Lockhart; for the degree of bachelor of arts, Leonard Keith Ward, B.E. (University of Sydney).

The Chancellor remarked that Mr. Corbin was a bachelor of science of the University of Sydney and was the first scholar of the University to accept the position of Government lecturer in forestry at the University of Adelaide. Mr. Corbin graduated with the highest marks in the degree of bachelor of science, obtaining first-class honors in physics in 1906. He had subsequent held masterships at Way and Princess' Alfred Colleges and was a bachelor of arts in 1904. Later he accepted the position of headmaster of the University of Sydney School, which left him in pursuit of his studies for the degree of science. Mr. Corbin had been doing research work at Oxford. Mr. Bushby was congratulated for his achievements. Mr. Corbin had been doing research work in the Department of Science and had been doing research work at Oxford. Mr. Bushby was congratulated for his achievements. Mr. Jack had been doing research work in the Department of Science and had been doing research work at Oxford. Mr. Bushby was congratulated for his achievements.

At the University of Adelaide, the Chancellor congratulated Messrs. W. T. G. Bowerman and E. J. Greig upon being the first graduates of the University to be awarded the new degree of Bachelor of Engineering. Both gentlemen, as students, had received the Diploma and fellowship of the School of Mines. Both had been successful in engineering, and other candidates for the degree had been eligible by surrendering the degree of bachelor of science. The Dean of the Faculty of Medicine, Dr. E. E. T. Tomlinson, expressed his appreciation of the good work done by the students and the successful candidates for the degree.
