Having carefully considered the case of the teachers in the four States the commission were agreed that the request of the Teachers' Union for the appointment of a classification board ought to be granted. The board should consist of three members, one of whom should be elected by the teachers. The members of the teachers' union would not necessarily be connected with the educational department, but it would be under the control of the teachers. Appealing from the decision of the board, the appeal would be referred to an appeal board. It was then discussed as to whether the standard of technical education should be raised to the standard of the University. It was the duty of the Director of Education to frame the curriculum and decide on the standard of education to be provided. It was considered that it would be an advantage to the assistant of the director of education to examine the assistant of the director of education. The students should be examined in the subject of technical education, and one member should be selected by all the teachers in the education department, and they should be examined in the subject of technical education. The examination was to be fair to the members of the committee. The committee was represented in the report, extended to those who were entitled to enter on professional career. When it was asked why the report was not published, it was said it was received too late to be able to publish it in the Register. It was published on the 26th September, and on that day in the Register.
