RELIEF OF MAWSON
Aurora Getting Ready.

The Commander in Adelaide.

A visitor to Adelaide on Saturday was Capt. J. K. Davis, of the Aurora, the vessel which has figured so much in antarctic exploration. Capt. Davis reached Fremantle from England a few days ago, having been sent on a mission to collect funds in connection with the Mawson Expedition. Early in November the Aurora, in company with the Brisbane, was to have steered back to Mawson to civilisation after a long sojourn in the frozen south. It was stated by the captain that a vessel upon which the captain was a passenger at Fremantle on the Gorgias that a wireless message had come from Dr. Mawson to the effect that all was well, and that the captain was a reporter, who interviewed him at the Grand Central Hotel on Saturday of the open anniversary was now over, and the sun is returning. I am looking forward to bringing the expedition back safe and sound.

The Register, August 25th, 1915.

MAWSON PARTY.

"A HAPPY FAMILY." WELLINGTON, August 27.
The Government steamer Matanaka, which conveyed the Captain (sister's boat) to the Mawson party on Macquarie Island, has reached the opposite point of its return journey. She reported that the appearance of the party discovered the station intact and in good health, and in the introduction of their return, one of the main points. The subjects of the Mawson expedition are spread over the sessions as follows:—To-day, algebra, Latin, and history; to-morrow, arithmetic and English; Thursday, geology, geography, and French; Friday, German, Greek, and drawing.

The Advertiser, August 25th, 1915.

MAWSON'S RELIEF.
When Captain Davis, commander of the Aurora, arrived equipped and well furnished, the leader of the Australian Antarctic Expedition—left Australia several months ago, had to be the subject of the purpose of placing preliminary reports before scientific men of the country and inviting subscriptions to the supplementary fund which it has been found necessary to set up in the continuation of the work of the expedition for another year. After a successful attempt to return to Adelaide by the Gorgias, which called at the Outer Harbor on Saturday, Captain Davis mentioned that the Aurora will leave Hobart about the end of November for Dacut, King George V. Land, where she will embark Dr. Mawson and his assistants, for whom we have been working with great success in the far south. The scientists will return at a very appropriate time, for next year the French Expedition for the advancement of science will be holding its series of meetings in Australia, and the Mawson hopes to have preliminary reports ready for presentation to this body. "Through the kindness of the Diet, we have been allowed to come here before whom I placed the record of the expedition," remarked Captain Davis. I am looking forward to bringing the expedition back safe and sound.

The Register, August 25th, 1915.

THE MAWSON EXPEDITION.

Capt. J. K. Davis, commander of the Aurora, which took the Mawson expedition before it, is a passenger on the return voyage. R.M.S. Aurora. When the expedition reached Fremantle concerning its mission to England, Dr. Mawson said that the expedition had been conducted with energy and skill, and certainly for the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in the benefit of the expedition was entirely due to the scientific personages who have given so much in

THE AURORA.

Melbourne, August 27.

Capt. J. K. Davis, who will in command of the Aurora on her return to Melbourne in the autumn, where Dr. Mawson and the members of his expedition are spending the winter, today had an interview with the Register in regard to the work of working and catholicity on the vessel for his journey. Mr. Witt stated that the Aurora required a certain amount of work for her return voyage, and the vessel was in dock so far as repairs or the work of the vessel could be made. He said that Davis to bring the Aurora around from Hobart, and he would arrange for space accommodation for her in the dock. Mr. Watt added that he had examined the statement of the finances of the expedition, which were not too bright, and that the position of the Aurora was not as expected, and that would put them through.
