The following resolutions were passed by the hygiene and sanitary science section:

That the Governments of the Australian States be circularised with the recommendations of the section on sanitary science; that the publication of this resolution should have special qualifications in public health and sanitation work and that it be signed by all the members of the section, and that the signatures be published in a public journal.

The resolution was then put to the vote and carried unanimously.

Mr. J. R. Govey, Governor of the British Medical Association, said that Professor Wood had made a valuable contribution to the discussion on the subject of the prevention of disease and that the resolution of the section was a valuable contribution to the work of the Association.

The President, Dr. J. T. Govey, said that the section had done excellent work and that the resolution was a valuable contribution to the work of the Association.

The President then declared the meeting closed.

The meeting adjourned at 8.30 p.m.

Yours truly,

J. T. Govey,
President.

Melbourne, January 15.
