- Agriculture
- Botany
- Chemistry
- Geology
- History and Economics
- Mathematics and Physics
- Medicine

The applications should reach the University, Perth, not later than 16th October, 1911.

SOLAR OBSERVATORY.

DR. W. G. DUFFIELD'S GIFTS.

Dr. W. G. Duffield, of Adelaide, South Australia, has been the recipient of a gift from the Commonwealth Government, a spectroheliograph, a plate, and a large spectrograph. These instruments, which were secretly accepted, will enable the equipment of a solar observatory in the country. The government would be useful in international research, and the whole world would benefit.

A VIST OF BRITISH SCIENTISTS.

The year 1914 will be a notable one for the Australian scientific circle. It has been decided to send a delegation of the members of the British Association for the Advancement of Science to the southern hemisphere, and it is expected that the members will return with a great show of progress. The exhibition of the scientific and technical exhibits is expected to be of great value to the students and to the public.

THE MAITSON EXPEDITION.

The Maitson Expedition, organised by Mr. C. G. Maitson, will visit the Aurora, an exploring ship. The expedition is expected to reach the southern hemisphere and return to England in about a fortnight. The expedition is expected to be of great value to the students and to the public.
