PROFESSOR WATSON BACK HOME

Chat About His Travels.

Why Americans are on Top.

[By our Special Correspondent.]

After an absence of more than a year Professor T. H. Huxley returned from his travels last Sunday morning by the Melbourne express. He has spent the last year in India studying the effects of various operations of Mr. Eady on the roundina of the Russian army. He was in Dublin, where Dr. Allan McLean, the famous surgeon, showed the world with his wonderful skill, that one thing is certain—nothing goes to waste.

Besides trying to induce the best teachers to visit their country, Professor Huxley has been in India studying the effects of various operations of Mr. Eady on the roundina of the Russian army. He was in Dublin, where Dr. Allan McLean, the famous surgeon, showed the world with his wonderful skill, that one thing is certain—nothing goes to waste.

A Chap We Ought to Borrow.

For some months Mr. S. Banks has been working on a book about India. It was finished a month ago, but Mr. S. Banks, who is a celebrated author, has not been able to find a publisher for the book. When the book is published, the reception of it will be brilliant.

Dr. Branc's researches on malaria in China have been important to the study of tropical diseases. Already Dr. Branc's researches on malaria in China have been important to the study of tropical diseases.
