A Distinguished Advocate.

Once a year is peace on earth universally proclaimed with waving flags and flagrant declarations. The International Peace Society does not welcome this observance of peace days. In many countries associations exist for the strenuous advocacy of war-like purposes, and the arming of the population is being carried on in the name of peace. The peace which they seek to propagate is always that of the strong arm of the conqueror; the peace they seek to destroy is that of the law of human nature. It is a peace which has been sent out to the uttermost parts of the earth and which is being sought after everywhere.

Among the leading men of the peace movement are Mr. Eugene Gordon, Chancellor of the University of Pennsylvania, who arrived from Mecca on Monday to address a meeting of the University of England on "War and Warlike." Mr. Gordon is a native of Great Britain, but the leaders of the peace movement are not all British. They are men who believe in the brotherhood of man, and who naturally being the voice of the nation is progressive in the maintenance of peace.

An Interview.

Professor Jordan asks the weight of his years well. Really he may not be as good as he was, but he is still as keen as ever. He was born in Victoria in 1860, and has been living in Great Britain ever since. Dr. Jordan was originally a lawyer, but he became interested in politics and in the International Peace Society, and has been a member of that organization for over thirty years. He has written many books on the subject of peace, and is considered one of the foremost authorities on the subject.

Ships do not constitute the whole of the nation's commerce. The value of ships is only a part, for it may be a very important part, of the nation's commerce. The cost of ships is a large item in the cost of goods produced in the United States. The value of ships is often many times the cost of the goods produced in the United States. Ships are not only used for transportation, but also for military purposes. The United States has many ships in commission, and is preparing to build many more. The value of ships is a large item in the cost of the nation's commerce, and is an important factor in the nation's prosperity.

Some ships are engaged in the transportation of goods, while others are used for military purposes. The United States has many ships in commission, and is preparing to build many more.
