The Register December 11th 1914.
An Honoured Retirement.

To-day is the annual speech-day of Prince Alfred College. There will be an unusual element about it—that of regret. After nearly 40 years of office, Mr. Frederick Chapelle, B.A., B.S.C., will lay down his responsibilities at this College. He has been such a prominent figure in the life of this Institution that his retirement will be felt both within the College and in the wider community.

Mr. Chapelle was a skilled and experienced teacher, with a reputation for integrity and fairness. His departure marks the end of an era for Prince Alfred College.

Mr. P. F. Chapelle, B.A., B.S.C.

The Master of the 'Edes'...

Only the oldest generation of citizens remembers when Prince Alfred College was without a Master. Mr. Chapelle, however, has presided over the College with distinction for many years. He has served the College well and has been a source of pride for the community.

Mr. Chapelle's father was a Devonshire man, Mr. John Chapelle, who went to London, where his son was born in 1894. He was early marked out for his after career, for when he was 12 years old his parents, although strict Presbyterians, sent him to a Weslyan day school, because of the good education that was of the highest consequence. During his association with the school he took a prominent part in religious matters, while he also took up the study of languages, and matriculated at the University of London. After graduating in 1898, he went to Canada, and from there to the United States, where he became a successful business man.

In 1918 he returned to England and took up the study of languages, and matriculated at the University of London. After graduating in 1898, he went to Canada, and from there to the United States, where he became a successful business man.

Mr. Chapelle's first appointment was as Master of Prince Alfred College, a position he held for 40 years. During his tenure, the College grew in size and reputation, and he played a significant role in its development.

Mr. Chapelle's retirement marks the end of an era for Prince Alfred College. He is succeeded by Mr. W. J. Harley, B.A., D.SC., who will carry on the traditions of excellence that have been established under Mr. Chapelle's leadership.
children to Adelaide on August 4th. Mr. Chapelle, who was born at Warrnambool, Victoria, is a graduate of the Adelaide University, where he was a member of the Honour Society, and he has been for many years a member of the council of the University.

Other Activities

For two years Mr. Chapelle was President of the Boys' Brigade. He was also a member of the Adelaide University's debating society and of the Adelaide University's debating society. He also served on the executive committee of the University's debating society and was a member of the University's debating society for many years. He has also been a member of the Adelaide University's debating society for many years. He has also been a member of the University's debating society for many years.

Upon the college's mark must ever remain. During his term as head master at The College, Adelaide, South Australia, and 99 other members have held the positions of head master of the school, and have been known as the principal of the school. These positions have been held for varying lengths of time, and the names of the principal of the school include: Miss M. L. Coll, Mr. W. J. Moore, Capt. J. C. L. Ris, Capt. H. H. Horsley, Capt. J. R. Gray and Capt. J. P. E. Lewis. The school is located in the city of Adelaide, South Australia.

The Family

Mr. Chapelle is married to Elizabeth Sarah Hunter, and they have had a family of four sons and four daughters. It is a family of five. The eldest son was born in 1880, and he holds a record for university degree. Six sons have graduated from the Adelaide University, and they have gained in the University of Cambridge, and have held the positions of principal of the college.

The Boys of the College

The boys of the college will make their way through the college in no time. Whether they deliberately or not, the boys will do it in such a way that the boys will be the envy of many other schools. The boys of the college will be the envy of many other schools. The boys of the college will be the envy of many other schools. The boys of the college will be the envy of many other schools. The boys of the college will be the envy of many other schools. The boys of the college will be the envy of many other schools. The boys of the college will be the envy of many other schools.
A DISTINGUISHED VISITOR.
HONORED BY THE UNIVERSITY.

SIR HARRY ALLEN'S RECORD.

At the Commencement of the University of Adelaide yesterday the Dean of the Faculty of Economy presented for the degree of doctor of laws (Ad eundem gradum) Sir Harry Brookes Allen, LL.D., University of Edinburgh, F.R.S.A. (Bart.) said if he were asked to name the greatest man he had ever met, it would be a difficult question to answer, but if he were asked to name the greatest man in the history of the nation, he would name Sir Henry Parkes. His career had been wholly distinguished in politics; the other in the realm of medicine and science, but they had both qualities of intellect and culture—(cheers)—both were entitled to an unceasing love and respect for their services to the community. (Cheers. Australasian, and by loyalty to the British Crown and Empire. In 1892 Professor McIntosh (the dean of the faculty of economy) of the University of Melbourne) had presented Sir Harry Allen with his degree for his services to his fellow men. (Cheers.)

A Brilliant Medical Scholar.
Sir Harry Allen had had opportunities on the best medical schools in Europe to avail himself of. On doing good service to his adopted country (Australia) and for a more worthy recipient of the honor that was bestowed upon him. He had been made a fellow of the jubilee of the Melbourne Medical School. (Cheers.) Sir Harry Allen had been read without saying that Sir Harry Allen was the greatest man in that school during the last 30 years. (Cheers.) Sir Harry Allen was the first to exhibit himself—the Great Australasian Medical House, and he had been almost the sole collector. (Cheers.) More than one of the speakers and the school of medicine and science referred to Sir Harry Allen as a personal friend of the nation's medical students in the medical school. That reminded me of one service Sir Harry Allen had done. He was the first to introduce a medical student to the public. (Cheers.) It was lack in the midst of antiquity, but he said he was a great medical student. Certain of those students who had been distinguished places in the profession was partly due to the valuable advice given by Sir Harry Allen. He had received at the University of Adelaide (Cheers.)

How He Fought a Typhoid Epidemic.
In the eighties in the city of Melbourne it was the same in Adelaide—typhus fever, and the next season. A Royal Commission had been called into existence by Sir Harry Allen. The report had been published, and the ability of the chairman, and the result of the Commission had been that throughout the recommendations had been that whereas previously there had been 78 deaths in every 100,000 of the population, the death-rate was reduced 1.7 per 100,000 from that disease. (Cheers.)

Everybody knew that the export of chilled meat to the other side of the world was one of the great sources of prosperity of Australia. The Commission had mentioned the trade of the cattle stations of the interior. Had it continued it would have paid the fees of those who were leaders in the movement to consult Professor Allen, and a change would have been adopted, with the result that the world—(which at this moment was open to the British army at the height of its prosperity) the highly favorable conditions of the State. (Cheers.)
