ADELAIDE ESSAYS.

"Reflections on the War," By Professor G. C. Henderson, M.A. (Oxford); Mayor and Sun, Adelaide.—Professor Henderson's latest contribution to the war has been most welcome. Its warm sympathy with the Belgian people, its acute insight into the minds of the nations, and its power to move the emotions, are not less striking. The author has not hesitated to express himself earnestly and courageously on the war question, and his tone and manner have been such as to command the respect and attention of all who are interested in the subject. He has shown a remarkable faculty of clear thinking and reasoning, and has been able to present his views in a most convincing and persuasive manner. His essay is a valuable contribution to the literature of the war, and will be read with interest and profit by all who are concerned in the great question of peace and justice. The author has shown a keen sense of justice and a deep feeling for humanity, and has not been afraid to speak out in defence of the defenceless and oppressed. His essay is a good example of how to write on a difficult subject, and is a model of clearness and conciseness. It will be read with interest and profit by all who are concerned in the great question of peace and justice.
