UNIVERSITY EXAMINATIONS.

From Trinity.—In common with many interested in the University examinations, I have waited for some authoritative announcement regarding the extraordinary shortening of the time allowed for the senior trigonometry paper, but vainly. Is the election of the faculty of the fact that some one badly flustered? Unfortuately, these examinations have to be passed, and, what with the yearly occurrence of errors in questions, going outside the set book, and occurrences of insufficient time, confusion of results, and other causes, the candidates cannot help wondering where they are.
