Abstract

This portfolio of compositions and exegesis submitted for the degree of Master of Music in Composition, at the Elder Conservatorium of Music, comprises original creative works supported by a detailed commentary. The creative investigation has focused on ‘Composing for a Choral Spectrum.’ This was investigated through practical experiments in choral composition, designed to test the compositional limitations of the choral spectrum, and resulted in a portfolio of choral works. The portfolio includes: simple choral works for young children in one part; choral works for children in two parts; choral works for children in three parts; a choral work for teenage treble voices; a multimedia choral work for boys with changing voices with a moving image DVD; a choral work for male voices; choral works for adult female voices; a complex choral work for adult choirs of a professional standard; and a larger scale choral and orchestral work. The exegesis provides a commentary on the genesis, composition processes, limitations and solutions, for each original work included in the portfolio.
