The Register, March 21, 1916

MOUNT REMARKABLE WELL REMODELED

"It is appropriately named," Mr. Thompson said, referring to the new name of Mount Remarkable, which replaces the former Mount Emu. The change was made at the Adelaide University, where one of the students, Mr. Thompson, is known as a scientific expert.

"A rock," he explained, "is a rock, whether it is cut in a piece or a whole. Mount Remarkable is a rock on a hill, which has a greater or lesser degree of elevation depending on how steep the hill is. Mount Emu is a rock on a hill, too, but it is not as steep as Mount Remarkable."

The new name has been well received by the students, who are enthusiastic about the change. They see it as a step forward in the university's efforts to promote scientific research. The students are also confident that the new name will create more interest in Mount Remarkable, which they believe is a great asset to the university.

The Register, March 22, 1916

UNIVERSITY OF ADELAIDE.
PUBLIC EXAMINATIONS BOARD.
SPECIAL SCHOOL EXAMINATION.

The Register, March 21, 1916

In reply to Mr. Taff, Professor Henders told the committee that there were not many demands for special school examinations. However, he said that he was prepared to consider any request that might be made.

The committee is now considering the possibility of a special school examination for students who have not completed their regular school work. The committee is also considering the possibility of a special examination for students who have completed their regular school work but are not eligible for the regular school examination. The committee is expected to make a decision on these matters in the near future.

The Register, March 22, 1916

At a meeting of the members of the University Council, it was decided to appoint a new dean. Mr. G. W. Smith, the present dean, has been asked to resign, and Mr. J. E. Green, the University Librarian, has been appointed as the new dean.

Mr. Smith has been dean for the past five years, and has made many contributions to the University. He has been a valuable member of the University Council, and has been a strong advocate of the University's policies.

Mr. Green has been a member of the University Council for the past three years. He is well known for his work in the University Library, and is highly regarded by the students.

The Register, March 22, 1916

At the meeting of the University Council, it was decided to appoint a new director of the University Press. Mr. J. E. Green, the present director, has been asked to resign, and Mr. W. J. Smith, the University Librarian, has been appointed as the new director.

Mr. Green has been director of the University Press for the past five years, and has made many contributions to the University. He has been a valuable member of the University Council, and has been a strong advocate of the University's policies.

Mr. Smith has been a member of the University Council for the past three years. He is well known for his work in the University Library, and is highly regarded by the students.
Unsatisfactory plans were reported at the meeting of the board of trustees of the University of Michigan. The plan of the board, which was adopted, was that the University should be located in the city of Ann Arbor, and that the President of the University should be selected by the board of trustees. The plan was opposed by a majority of the board, who believed that the University should be located in the country, and that the President of the University should be elected by the students. The plan was subsequently adopted by the board of trustees, and the University was located in the city of Ann Arbor, and the President of the University was elected by the students. The University was established in 1817, and has since been highly regarded for its excellence in education. It is one of the oldest and most respected universities in the United States. The University has been a center of learning and research, and has produced many outstanding scholars and leaders. The University is located in the heart of the state of Michigan, and is surrounded by beautiful natural scenery. It is a popular destination for both domestic and international students, and is known for its strong academic programs and friendly community. The University is committed to providing a high-quality education to all students, and has a strong emphasis on research and innovation. It is a place of learning and discovery, and is loved by those who have the privilege of being a part of it.
TOPICS OF THE DAY

ADELAIDE FOR INTELLECT

The intellectual life in Adelaide is much
more vigorous among the younger genera-
tions than it is in either of the other
capital cities. Giving evidence before the
North Terrace Reserves Commission yester-
day morning, Mr. J. H. Allen, of the Cha-
per, handed in some figures which he had
just computed. He showed that in every
city, where there were no musical students, 2,3
per thousand of the population were stu-
dents at the university, in Melbourne, where
there were very few musical schola-
s, the proportion jumped to 5 per thousand
In Adelaide, omitting the musical stu-
dents, the proportion of the popula-
tion attending the University, taking the
University musical students into considera-
tion, the percentage jumped to 8 per thousand.
This was ascribed largely to the central posi-
tion of the University.

Rev. J. H. Allen left by the R.M.S.
Malwa for Bombay yesterday as one of the
Australian representatives of the Metho-
dist Missionary Society to India. Mr. Allen,
who was unable to complete
his studies at the University (on
leaving to a specified time, has now
completed his work at the Univer-
sity, and is securing his B.S.C. degree.
Mrs. Allen is also a graduate in this
University.

Miss Vera Thrush, A.M.L.A., winner of
one of the Elder scholarships for singing
this year, is already well known in Adel-
elaide as a promising singer. She has been
a pupil of Mr. J. H. Winslade, who
introduced her to the art of singing. In
addition to being the possessor of a soprano
voice of beauty, she is an excel-
lent all-round musician. In 1913 she
was runner-up for the pianoforte Elder
scholarship, and owing to the winner's
absence, received the pecuniary benefits thereto.
She is the pupils of Miss W. Head and

Miss Vera Thrush.

Mr. G. I. Relpham, and studied theory
under Miss Florence Cooke, Mus. Bacc. Last
year she was chosen for the Conserva-
tory of Music, and the following year
was, as the deserving student for the
Elder scholarships, the 2 per thousand,
and one of the students of the University,
who was adjudged to be the best of the
Ensemble Choir, under the direction of Dr. Evans. Miss
Thrush is 20 years of age, and the daughter of Mr. Harry Thrush, Kensington-road,
Park.
Mr. Harold J. Gird, who has recently been awarded the Alexander Smith Memorial Prize, which entitles him to a year's study at the University of Adelaide, enjoys the possession of phenomenal vocal tones. He has a tessitura, ranging from C to D, in which range he carries his voice unassisted. He is an oscillator tenor, and possesses a very powerful voice. His study, up to the present, has been the capable teaching of Mr. W. C. Hall. Mr. Gird intends, also, to spend his three years in Adelaide, to proceed to Paris to study under Mr. H. H. Friede, and to master French and Italian under Mons. Maurice Byram. His theory, with the help of Mr. Florentino Pizzaro, is planned to become more effective while he is studying French and Italian under Mons. Maurice Byram; also theory, with the help of Mr. P. F. Wheelwright Bowring, A.M.C., L.R.A.B. A spented future should be before the young singer, who has only just reached his 22nd year.

Professor Mitchell, who was on Monday elected Vice-Chancellor of the University of Adelaide.

MATHEMATICAL QUERY.

From Cha. Newman:—The statement is made by Mr. Win. Whinham in your issue of 2nd inst. that the rule applied by mathematicians to find the correct volume of a pyramid of a cube or rectangular figure is not applicable, and foreign to the question, viz., the area of the base by one-third the height of its apex. The question submitted to find the volume of 50 parts of a pyramid is a puzzle to me. In adding up the 50 first parts I make 2 & 3/4. No doubt that it is an error of copy, and the second answer should be 28 instead of 26, as they are rising numbers. I shall esteem it a favor to receive through the medium of your columns an expert proof from one or more of our schoolmasters or professors.
