

# **SOFT TISSUE ATTACHMENT TO TITANIUM IMPLANTS COATED WITH GROWTH FACTORS**

**A report submitted to the University of Adelaide in partial  
fulfilment of the requirements of the Degree of Doctor of  
Clinical Dentistry (Periodontology)**

Christopher William BATES BDS (Adel), MClinDent (Pros) (Lond)

## DECLARATION

This work contains no material which has been accepted for the award of any other degree or diploma in any university or other tertiary institution to Christopher Bates and, to the best of my knowledge and belief, contains no material previously published or written by another person, except where due reference has been made in the text.

I give consent to this copy of my thesis, when deposited in the University Library, being made available for loan and photocopying, subject to the provisions of the Copyright Act 1968.

I also give permission for the digital version of my thesis to be made available on the web, via the University's digital research repository, the Library catalogue, the Australasian Digital Theses Program (ADTP) and also through web search engines, unless permission has been granted by the University to restrict access for a period of time.

## **ACKNOWLEDGEMENTS**

The following people have been instrumental in the commencement and completion of this research project:

The principal supervisor, Professor Mark Bartold, for the original idea, expert knowledge and guidance for this research project.

The laboratory supervisor, Mr Victor Marino, for his expertise, tireless efforts and infectious enthusiasm.

Professor Nick Fazzalari for his advice and making available the use of his staff and laboratory.

Ms Vivienne Le from the Bone and Joint Research Laboratory, IMVS, for her skills in tissue sample processing; Ms Lyn Waterhouse from Adelaide Microscopy for her expertise in confocal microscopy; and Ms Catherine Offler from the Colgate Australian Clinical and Dental Research Centre for her assistance in the final editing of this manuscript.

# TABLE OF CONTENTS

DECLARATION .....	2
ACKNOWLEDGEMENTS .....	3
TABLE OF CONTENTS .....	4
Chapter 1. A REVIEW OF THE STRUCTURE OF THE PERI-IMPLANT SOFT TISSUES AND THE POSSIBLE IMPLICATIONS OF COATING TITANIUM IMPLANTS WITH GROWTH FACTORS ON SOFT TISSUE ATTACHMENT .....	9
1.1 INTRODUCTION .....	10
1.2 DENTOGINGIVAL JUNCTION .....	11
1.2.1 Oral Epithelium .....	12
1.2.2 Oral Sulcular Epithelium .....	13
1.2.3 Junctional Epithelium .....	14
1.2.4 Connective Tissue .....	15
1.3 DENTAL IMPLANT / PERI-IMPLANT MUCOSA INTERFACE .....	17
1.3.1 Histology .....	17
1.3.2 Animal and Human Studies .....	18
1.3.3 Mucosal Barrier at Single- and Two-Stage Implant Abutments .....	19
1.3.4 Vascular Supply of the Peri-Implant Mucosa .....	21
1.3.5 Morphogenesis of the Peri-Implant Mucosa .....	21
1.4 INFLUENCE OF IMPLANT SURFACE CHARACTERISTICS ON SOFT TISSUE INTEGRATION .....	22
1.4.1 Influence of Material Type .....	23
1.4.2 Effect of Surface Topography .....	24
1.4.3 Effect of Surface Modification .....	27
1.5 GROWTH AND DIFFERENTIATION FACTORS .....	28
1.6 PLATELET-DERIVED GROWTH FACTOR (PDGF) AND INSULIN-LIKE GROWTH FACTOR (IGF) .....	29

1.6.1 Animal and Human Studies using PDGF and IGF .....	30
1.6.2 Animal and Human Studies using PDGF-BB.....	32
1.7 TRANSFORMING GROWTH FACTOR (TGF) AND FIBROBLAST GROWTH FACTOR (FGF) .....	35
1.8 BONE MORPHOGENETIC PROTEINS (BMP).....	36
1.8.1 Animal Studies using BMP .....	37
1.8.2 Reosseointegration with BMP .....	38
1.9 ENAMEL MATRIX PROTEIN DERIVATIVES (EMD).....	38
1.9.1 Animal Studies using EMD .....	40
1.9.2 Human Studies using EMD in Intrabony Defects .....	41
1.9.3 Human Studies using EMD in Furcation Defects.....	44
1.9.4 Human Studies using EMD in Gingival Recession Defects.....	45
1.10 CONCLUSIONS .....	47
1.11 REFERENCES .....	49
Chapter 2. SOFT TISSUE ATTACHMENT TO TITANIUM IMPLANTS COATED WITH GROWTH FACTORS .....	67
2.1 ABSTRACT .....	68
2.2 INTRODUCTION .....	69
2.2.1 Platelet-Derived Growth Factor (PDGF).....	72
2.2.2 Enamel Matrix Protein Derivatives .....	72
2.3 HYPOTHESIS AND AIM .....	74
2.4 SIGNIFICANCE OF THE AIM.....	75
2.5 MATERIAL AND METHODS .....	75
2.5.1 Animals .....	75
2.5.2 Implants .....	75
2.5.3 Pilot Study .....	75
2.5.4 Major Experimental Study .....	76

2.5.5 Preparation of Growth Factors.....	76
2.5.5.1 Enamel Matrix Protein Derivative .....	76
2.5.5.2 rhPDGF-BB .....	77
2.5.6 Surgical Procedures .....	77
2.5.7 Implant Retrieval .....	78
2.5.8 Resin Embedding.....	78
2.5.9 Confocal Laser Scanning Microscopy Analysis.....	79
2.5.10 Thin Sections .....	79
2.5.11 Histomorphometric Measurements.....	80
2.5.12 Statistical Analysis.....	81
2.6 RESULTS.....	81
2.6.1 Histological Assessment – Qualitative Analysis at Four weeks.....	81
2.6.2 Histological Assessment – Qualitative Analysis at Eight weeks.....	84
2.6.3 Histomorphometric Measurements.....	91
2.7 DISCUSSION .....	97
2.8 REFERENCES .....	106
Chapter 3. FUTURE DIRECTIONS.....	116
3.1 FUTURE DIRECTIONS.....	117
3.2 REFERENCES .....	119
Chapter 4. APPENDIX .....	123
Appendix 4.1 Methyl methacrylate (MMA) embedding flow chart. ....	123
Appendix 4.2 Methyl methacrylate (MMA) embedding procedure.....	124
Appendix 4.3 Thickness of fibroblast layer at the implant threads – 4 week measurements (raw data).....	125
Appendix 4.4 Thickness of fibroblast layer at the implant threads (µm) – 8 week measurements (raw data).....	126

Appendix 4.5 Depth of connective tissue penetration into the implant grooves – 4 week measurements (raw data).....	127
Appendix 4.6 Depth of connective tissue penetration into the implant grooves (µm) – 8 week measurements (raw data). ....	128
Appendix 4.7 Thickness of fibroblast layer at the implant thread – 4 week measurements.....	129
Appendix 4.8 Thickness of fibroblast layer at the implant thread – 8 week measurements.....	130
Appendix 4.9 Depth of connective tissue penetration into the implant grooves – 4 week measurements.....	131
Appendix 4.10 Depth of connective tissue penetration into the implant grooves – 8 week measurements.....	132
Appendix 4.11 One-way ANOVA of the 4 week measurements of the thickness of the fibroblast layer at the implant threads.....	133
Appendix 4.12 One-way ANOVA of the 8 week measurements of the thickness of the fibroblast layer at the implant threads.....	134
Appendix 4.13 One-way ANOVA of the 4 week measurements of the depth of connective tissue penetration into the implant grooves. ....	135
Appendix 4.14 One-way ANOVA of the 8 week measurements of the depth of connective tissue penetration into the implant grooves. ....	136
Appendix 4.15 t-test of thickness of fibroblast layer at the implant threads between control (uncoated) implants at 4 weeks versus 8 weeks. ....	137
Appendix 4.16 t-test of thickness of fibroblast layer at the implant threads between Emdogain® coated implants at 4 weeks versus 8 weeks.....	138
Appendix 4.17 t-test of thickness of fibroblast layer at the implant threads between rhPDGF-BB coated implants at 4 weeks versus 8 weeks. ....	139

Appendix 4.18 t-test of depth of connective tissue penetration into the implant grooves between control (uncoated) implants at 4 weeks versus 8 weeks. ....	140
Appendix 4.19 t-test of depth of connective tissue penetration into the implant grooves between Emdogain® coated implants at 4 weeks versus 8 weeks.....	141
Appendix 4.20 t-test of depth of connective tissue penetration into the implant grooves between rhPDGF-BB coated implants at 4 weeks versus 8 weeks. ....	142
