APPENDICES
Appendix a
Ethics approval from the University of Adelaide

25 January 2007

Associate Professor Ali
Clinical and Experimental Pharmacology

Dear Associate Professor Ali

PROJECT NO:  
H-156-2005  
An analysis of treatment retention in methadone maintenance programs in Indonesia and its predictive variables

Thank you for your report on the above project. I write to advise you that I have endorsed renewal of ethical approval for the study on behalf of the Human Research Ethics Committee.

The expiry date for this project is: 31 January 2008

Where possible, participants taking part in the study should be given a copy of the Information Sheet and the signed Consent Form to retain.

Please note that any changes to the project which might affect its continued ethical acceptability will invalidate the project’s approval. In such cases an amended protocol must be submitted to the Committee for further approval. It is a condition of approval that you immediately report anything which might warrant review of ethical approval including (a) serious or unexpected adverse affects on participants (b) proposed changes in the protocol; and (c) unforeseen events that might affect continued ethical acceptability of the project. It is also a condition of approval that you inform the Committee, giving reasons, if the project is discontinued before the expected date of completion.

A reporting form is available from the Committee’s website. This may be used to renew ethical approval or report on project status including completion.

Yours sincerely

Professor Garrett Culty
Convenor
Human Research Ethics Committee

REKOMENDASI PERSETUJUAN ETIK
PENELITIAN KESEHATAN

Yang bertanda tangan di bawah ini, Ketua Komisi Etik Penelitian Kesehatan Badan Penelitian dan Pengembangan Kesehatan, setelah dilaksanakan pembahasan dan penilaian, dengan ini memutuskan protokol penelitian yang berjudul:

"ANALISIS DAYA TAHAN PASIEN PROGRAM RUMATAN METHADONE DAN FAKTOR-FAKTOR PREDIKTIF"

yang menggunakan manusia sebagai subyek penelitian, dengan Ketua Pelaksana/Peneliti Utama:

Dra. Riza Sarasvita, M.Si. MHS

dapat disetujui pelaksanaannya. Rekomendasi persetujuan ini berlaku sejak mulai dilaksanakannya penelitian tersebut di atas sampai dengan selesai.

Jakarta, 5 Mei 2006

Ketua
Komisi Etik Penelitian Kesehatan

STUDY ON TREATMENT RETENTION IN METHADONE MAINTENANCE PROGRAMS IN INDONESIA

Primary Researcher: Riza Sarasvita
Telephone: 62-811-807634 / 62-21-7656141

Introduction. You are being asked to participate in a research study entitled Study on Treatment Retention in Methadone Maintenance Programs in Indonesia. The purpose of the research is to look at people’s background and experience with methadone maintenance program and how it affect the duration in treatment. Your participation in the study is entirely voluntary and you may choose to withdraw at any time. Before agreeing to take part in the study, please read the following information carefully and feel free to ask the interviewer any questions you might have.

Summary of Research. This project aims to look at peoples’ background and experience with methadone maintenance treatment for problems relating to heroin or other opioid dependence. The study gathers information about demographic background, drug-use experience, health and psychological status, as well as perception on on-going program. It also aims to see what are the characteristics of treatment retention in Indonesia and how peoples’ background and experiences with the treatment affect the duration of the treatment.

If you choose to participate, you will be asked to complete an initial interview with a trained research interviewer, about your background and experiences with the treatment program. This interview will take around 90 minutes. You are also asked to take part in another two interviews, one at 3 months following commencement of treatment, and another at 6 months, but with less questions than the ones asked in the first interview, therefore the interview in the follow-up stages will be shorter (around 45 minutes).

The interviews will cover information about you such as:

- Your demographic background
- Your drug use, drug treatment and legal history
- Your previous risk-taking behaviour in relation to drug use and sexual activity;
- Your beliefs toward program
- Your social network supports
- Your psychological profile

In addition, research staff will access your medical notes to record the necessary data related to the above issues and lastly, you will be asked to participate in HIV counselling, where your willingness to test and disclose of HIV status will be entirely voluntary.

Confidentiality. Your name will not be recorded anywhere on the interview forms. In order to preserve your confidentiality, only an anonymous subject number will be associated with the information you provide. Your name will not appear on any publication or be released to anyone without your written consent.

Risks. There are very few risks associated with participation in this study. However, a possible risk related to participation is a breach of your confidentiality. Every effort will be made to ensure your confidentiality. However, there are limits of confidentiality that you should be aware of. If you provide information that suggests you are abusing or neglecting your child(ren) or for other purposes which are required by the Indonesian law, the staff is obliged to report this to the proper authorities, and if you are a danger to yourself or others, the staff is required to take whatever action is necessary to protect you or them.
Some questions, such as those regarding sexual practices or previous criminal activity, may make you feel uncomfortable, and you are free to refuse to answer any questions.

**Benefits.** Although there are no specific benefits for you, your participation may help us in ensuring that the maintenance treatments for drug dependence are delivered in the best possible way, and that related health services are tailored to the needs of patients.

**Compensation.** You will be compensated for your participation at baseline, three-month follow-up, and six-month follow-up. You will receive Rp. 20,000,- for completing each review as compensation for your time and travel.

**Other Information.** Your participation in the study is completely voluntary, and you may decline to answer any of the interview questions. You may withdraw your participation in the study at any time. Choosing not to participate at any time will not affect treatment services you may be eligible for now or in the future. You can ask questions about this project at anytime. There will be fixed money compensation for the time you have spent for the interview sessions.

If you require further information about the study at any time, you may contact:

- Riza Sarasvita (telephone 62-811-807634 or 62-21-7656141) at RS Ketergantungan Obat Jakarta

Should you wish to discuss the project with someone not directly involved, in particular in relation to policies, your rights as a participant, or to make a confidential complaint, you may refer to the University’s independent complaints procedure form.
CONSENT FORM

1. I, ………………………………………………………………………………… (please print name) give consent to take part in the research project entitled **Study on Treatment Retention in Methadone Maintenance Programs in Indonesia**

2. I acknowledge I have read the written Information Sheet and that the nature, purpose and the effect of research project, especially as they affect me, have been fully explained to my satisfaction by …………………………………………………………… (please print name) and my consent is freely given

3. In addition to participating in study interviews, I give my consent to:
   a. be contacted for follow-up interviews at 3 and 6 months after the first interview;
   b. join the HIV counselling, without any obligation to test and disclose my HIV status
   c. allow research staff to access my medical notes to record the necessary data related to the research issues

4. Although I understand that the purpose of this research project is to improve the quality of methadone maintenance treatment, it has also been explained that my involvement may not be of any direct benefit to me.

5. I have been given the opportunity to have a member of my family or a friend present while the project was explained to me.

6. I have been informed that, while information gained during the study may be published, I will not be identified and my personal results will not be divulged.

7. I understand that I am free to withdraw from the project at any time and that this will not affect quality of treatment that I’m receiving now or in the future.

8. I am aware that I should retain a copy of this Consent Form, when completed, and the attached Information Sheet.

9. I declare that I am over the age of 18 years

………………………………………………………………………………………………

.. (signature) (date)

WITNESS

I have described to ……………………………………………………… (name of subject) the nature of the research to be carried out. In my opinion she/he understood the explanation.

Name ……………………………... Status in Project: …………………………..

Complaint Form

THE UNIVERSITY OF ADELAIDE
HUMAN RESEARCH ETHICS COMMITTEE

Document for people who are participants in a research project

CONTACTS FOR INFORMATION ON PROJECT AND INDEPENDENT COMPLAINTS
PROCEDURE

The Human Research Ethics Committee is obliged to monitor approved research projects. In conjunction with other forms of monitoring it is necessary to provide an independent and confidential reporting mechanism to assure quality assurance of the institutional ethics committee system. This is done by providing research participants with an additional avenue for raising concerns regarding the conduct of any research in which they are involved.

The following study has been reviewed and approved by the University of Adelaide Human Research Ethics Committee and the Ethics Committee of Health Research, the National Institute on Health, Ministry of Health, Republic of Indonesia

Project title: STUDY ON TREATMENT RETENTION IN METHADONE MAINTENANCE PROGRAMS IN INDONESIA

1. If you have questions or problems associated with the practical aspects of your participation in the project, or wish to raise a concern or complaint about the project, then you should consult the project co-ordinator:
   Name: Riza Sarasvita
   telephone: 62-811-807634 or 62-21-7656141

2. If you wish to discuss with an independent person matters related to
   • making a complaint, or
   • raising concerns on the conduct of the project, or
   • the University policy on research involving human participants, or
   • your rights as a participant

Contact:
   o the Ethics Committee of Health Research, the National Institute on Health, Ministry of Health, Republic of Indonesia on phone (62) 21 4261088 – 4244693 – 4243314 or fax number (62) 21 4243933
   o Secretary, Human Research Ethics Committee, Research Ethics and Compliance Unit, The University of Adelaide, on phone (61) 8 – 8303 6028 or fax (61) 8 – 8303 7325
Appendix f
Interviewer-administered Questionnaire

Section 1:

PARTICIPANT ID: ___ / ___ / ___ / ___ / ___ / ___ / ___
INTERVIEWER ID: ___ / ___ / ___ / ___ / ___ / ___ / ___
DATE: DAY / MO / YR
INTERVIEW: ___ (___)

1. For current episode, when did you start methadone treatment in this clinic? ___ / ___ / ___ / ___ / ___ / ___ / ___

2. How did you first hear about methadone maintenance program? ___ / ___ / ___ / ___ / ___ / ___ / ___

3. Who first suggested that you come to this clinic?
   1 – Parents
   2 – Family
   3 – Friends
   4 – Spouse (husband/wife/boyfriend/girlfriend)
   5 – Outreach worker
   6 – Health professional from RSKO
   7 – Health professional from outside RSKO

4. Are you under any pressure to come to methadone maintenance clinic? 0 – NO  1 – YES

5. How many times in the past 30 days have you:
   1. Had urinalysis for drug testing in this clinic? ___ | ___
   2. Had an individual counseling for blood borne viruses? ___ | ___
   3. Had your blood drawn for testing in this clinic? ___ | ___
      If yes, was this for: 0 - No 1 - Yes
      a) Hepatitis _____
      b) HIV ______
      c) Other disease _____
Section 2: Demographic Information

I’d now like to ask you some general questions. I also want to remind you that the information you give to me is completely confidential and will be used for research purposes only.

1.1 GENDER [Record sex as observed] 1 – Male 2 – Female ____

1.2 How old are you? [Record age in years] ____ / ____ years

1.3 What is your current marital status?
   1 - Currently married 4 - Widowed (not currently married)
   2 - Cohabiting (living together) 5 - Divorced (not currently married)
   3 – Separated (but still married) 6 - Never been married ____

1.4 Usual living arrangements (past 3 years)? → ASI
   [Read all response categories to the participant]
   1 – With parents
   2 – With family
   3 – With friends
   4 – With partner (husband/wife) and children
   5 – With partner alone
   6 – With children alone
   7 – Alone
   8 – Controlled environment
   9 – No stable arrangements
   10 – Other [Specify:] ______________ __

1.5 How long have you lived with these living arrangements?
   (if with parents or family since age 18) → ASI ___ / ______ ___ / ___
   Years Months

1.6. What do you consider your ethnicity to be?
   2. Tapanuli 10. Aceh
   5. Sunda 13. Other (Specify)………..
   6. Makassar
   7. Ambon
   8. Bali

1.7 What is your current religious preference?
   1 – Islam 6 – Jewish
   2 – Protestant 7 – Kong hu cu
   3 – Catholic 8 – Other, Specify ___________
   4 – Buddhist 9 – None
   5 – Hindu __

1.8. Now I want to ask you about work. In the last 12 months, how many months have you been employed? [Count self-employment or salaried. If none, code “00” and skip to Question 1.12. If less than 1 month, code “01”]
   ____ / ____ months
1.9  a. Are you employed now?  
   1 – No  [Skip to Question 1.12]  
   2 – Yes  

b. Do you work full-time or part-time?  
   1 – Full-time  
   2 – Part-time  

c. What kind of work do you do?  [Specify:]  

d. In what kind of business or industry are you working?  
   [Specify:]  

1.10 How many years of education have you completed?  
   ___ / ___ years  

1.11 a. Are you still studying at school, university, college, technical school or other educational institution?  
   1 – No  
   2 – Yes  [End]  

b. How old were you when you stopped being a full-time student?  
   ___ / ___ years  

1.12 Did you graduate from the last school, university, college, technical school or other educational institution you attended (does not include current place of study)?  
   1 – No  
   2 – Yes

Section 6:
Legal Status

In this section I am interested in any crimes that you may have committed. Any information that you give here is completely confidential.

Property Crime
First, I am going to ask you some questions on property crime. By property crime I mean things such as break and enter, robbery without violence, shoplifting, stealing a prescription pad, stealing a car, or receiving stolen goods. I am interested in the number of times that you committed a property crime, not the number of times you've been caught.

5.1. How often, on average, during the last month have you committed a property crime?
   0 – No property crime
   1 – Less than once a week
   2 – Once a week
   3 – More than once a week (but less than daily)
   4 – Daily

Dealing
Now I am going to ask you some questions about dealing. By dealing I mean selling drugs to someone. I am interested in the number of times that you've dealt drugs, not the number of times you've been caught.

5.2. How often, on average, during the last month have you sold drugs to someone?
   0 – No drug dealing
   1 – Less than once a week
   2 – Once a week
   3 – More than once a week (but less than daily)
   4 – Daily

Fraud
Now I am going to ask you some questions about fraud scams. By fraud I mean things such as forging cheques, forging prescriptions, social security scams, or using someone else's credit card. I am interested in the number of times that you've committed fraud, not the number of times that you've been caught.

5.3 How often, on average, during the last month have you committed a fraud?
   0 – No fraud
   1 – Less than once a week
   2 – Once a week
   3 – More than once a week (but less than daily)
   4 – Daily

Crimes Involving Violence
Finally, I am going to ask you some questions about crimes involving violence. By crimes involving violence I mean things such as using violence in a robbery, armed robbery, assault, rape, etc. I am interested in the number of times that you've committed a crime involving violence, not the number of times that you've been caught.

5.4. How often, on average, during the last month have you committed a crime involving violence?
   0 – No violent crime
   1 – Less than once a week
   2 – Once a week
   3 – More than once a week (but less than daily)
   4 – Daily
Section 7: Heroin Use Self Report

Heroin
Now I'm going to ask you some questions about heroin (smack, hammer, horse, scag, etc.).

5.1.1 How many days ago did you last use heroin? ___ /___
5.1.2 How many hits, smokes, snorts, etc. did you have on that day? ___ /___
5.1.3 How many days before that did you use heroin? ___ /___
5.1.4 And how many hits, smokes, snorts, etc. did you have on that day? ___ /___
5.1.5 And when was the day before that (within last 30 days)? ___ /___

5.1.6 \( q_1 = , q_2 = , t_1 = , t_2 = \)  Q: _______

Other Opiates
These questions are about your use of opiates other than heroin (e.g. street methadone, morphine, pethidine, codeine)

5.1.7 How many days ago did you last use opiates other than heroin?
   (do not include legally obtained methadone) ___ /___
5.1.8 How many pills, doses, etc. did you have on that day? ___ /___
5.1.9 How many days before that did you use opiates other than heroin? ___ /___
5.1.10 And how many pills, doses etc. did you have on that day? ___ /___
5.1.11 And when was the day before that (within last 30 days)? ___ /___

5.1.12 \( q_1 = , q_2 = , t_1 = , t_2 = \)  Q: _______
Section 8: Treatment Accessibility

1. Who do usually support you for your drug treatment charge?
   0 Yourself
   0 The people who you live with
   0 Family outside your home
   0 Friend
   0 Subsidy from the treatment program
   0 Others (specify) ........................................

2. Who do currently support you for methadone therapy?
   0 Yourself
   0 The people who you live with
   0 Family outside your home
   0 Friend
   0 Subsidy from the treatment program
   0 Others (specify) ........................................

3. How long (in minutes) do you usually travel from your home to the clinic?
   0 Less than 15 minutes
   0 15 – 30 minutes
   0 31 – 60 minutes
   0 More than 60 minutes

4. What is your mode of transportation that you usually use to reach the clinic from your home?
   0 Your own motorcycle
   0 Your own car
   0 Public buses
   0 Rent a motorcycle / car
   0 Someone gives you a ride
   0 Others (specify) .................................

5. How much money do you usually spend a day in joining methadone program? (including service charge, transportation and miscellaneous expenses)
   0 Rp. 15.000,- - Rp. 30.000,-
   0 Rp. 31.000,- - Rp. 50.000,-
   0 More than Rp. 50.000,-

6. From all money (income) do you get, approximately what is the proportion of your allocation to access methadone treatment? ..........%
Appendix g
Self-administered Questionnaire

Part 1: Visual Analog Scale

All the questions in this questionnaire are about what has happened to you since being in the methadone maintenance program. All the information you give here will be kept confidential. Answer each question honestly and accurately.

Make a vertical line across the line below to show what you think about your methadone program.

Example: If you feel that Methadone has quite a positive effect, put the vertical line between „quite well“ and „very well“. You can put the vertical line anywhere you like:

Not very well | Quite well | Very well

Do the same thing for the following questions.

A1. How well does methadone work for you?

Not very well | Quite well | Very well

A2. To what extent does methadone give you a feeling of euphoria?

Not at all | Moderately | Very strongly

A3. How many side effects (negative) do you have from methadone?

None at all | Some | A lot

A4. To what extent do these side effects of methadone bother you?

Not at all | Sometimes | A lot

A5. To what extent do you like methadone?

Not at all | Moderately | A lot
A6. Does methadone make you feel more “normal”?

No, not at all    Moderately    Yes, very much

A7. To what extent did you crave heroin when you were in the methadone program?

Not at all    Sometimes    Always

A8. In your opinion, what are the best things about methadone?

A9. In your opinion, what are the worst things about methadone?

PART 2:
Survey about Yourself, your Social Situation and the Methadone Maintenance Program

Give your response to each statement below by writing an X in the box that indicates how far you agree or disagree with the statements. Mark only the one box that is closest to your view. Thank you for your participation.

<tr>
<td>15) It is unethical to maintain addicts on methadone indefinitely</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
16) The clinician’s principal role is to prepare methadone maintenance patients for drug-free living

17) It is unethical to deny a narcotic addict methadone maintenance

18) Confrontation is necessary in the treatment of drug addicts

19) The clinician should encourage patients to remain in methadone maintenance for at least three to four years

20) Methadone maintenance patients who continue to use illicit opiates should have their dose of methadone reduced

**Strictness About Methadone Policies:**

21) Maintenance patients who ignore repeated warnings to stop using heroin should be expelled from treatment

22) Methadone services should be expanded so that all heroin addicts who want methadone maintenance can receive it

23) Patients on high methadone doses should get fewer take-homes than patients on low doses

24) Methadone maintenance patients who continue to abuse non-opioid drugs (e.g., benzodiazepines) should have their dose of methadone reduced

25) Heroin addicts should be given methadone maintenance only after alternative treatments have been unsuccessful

26) Methadone patients who complain about their program should be encouraged to leave

27) Heroin addicts should be given long-term maintenance only after short-term maintenance has been unsuccessful

28) Methadone patients who continue to use illegal drugs should be discharged to make way for others more likely to benefit from treatment

**Negative Patient Opinions:**

29) Many patients here just want a break from hustling (they don’t really want to stop heroin addiction)
30) Many patients here are sincerely working toward their recovery

31) Many patients here are generally uncooperative

32) Most heroin addicts use drugs because they have to, not because they want to

**Incorrect Medical Information:**

33) Methadone maintenance can cause liver damage

34) Methadone is more dangerous than heroin to the unborn child

35) Stable doses of methadone significantly interfere with the ability to drive a car and operate machinery

36) Methadone maintenance increases the severity of pre-existing depression

37) Methadone maintenance can cause kidney damage

Letter of Translation Appropriateness

Jl Senayan H31/14
Bintaro Jaya Sektor 9
Tangerang 15229
Indonesia

24 July 2009

To whom it may concern

Having completed the back-translation of the client and staff questionnaires and compared these translations with the original source texts, I can verify that the Indonesian versions of both questionnaires are valid and appropriately worded translations of the original texts. There were minimal differences of any significance between the original and Indonesian versions of any of the items.

Sincerely,

Sally Wellesley
Translator
