PRACTICAL SCHEMES.

Educational improvements had drawn scores of schemes for the commercial and technical classes, which had been approved by previous meetings. One of the targets for the next session was an effort to improve the financial situation of the school. The plan was to raise funds by selling stock in the form of shares, and to invest these funds in real estate or other ventures that would yield a profit. The idea was to provide a source of income for the school that would help to reduce the need for tuition fees.

On the other hand, the educationalist did not neglect the practical side of the problem. He was aware that the business world was not interested in the theoretical knowledge of young men, but in their practical abilities. He therefore urged the introduction of more practical subjects into the curriculum, such as bookkeeping, accounting, and commercial law. He felt that if a student could learn to handle his finances, he would be better prepared to enter the business world.

The course of training needed to make a successful businessman could be divided into two parts, the first part being theoretical and the second part practical. The theoretical part would consist of subjects such as mathematics, economics, and business law. The practical part would be devoted to hands-on experience in a business setting.

A POLL TO BE TAKEN.

Considerable warmth was shown by some of the speakers on both sides of a policy debate, which was held in the Elliot Town Hall on Friday afternoon, to consider the effect of the Lawn Tennis Association's proposal for the transfer of the old court to a more central location. The members were divided on the issue, with some supporting the move and others opposing it.

The proposal was to move the court to a site more accessible to the public, in order to increase its usage and make it more attractive to potential members. Those against the move argued that the old court was a community asset and should not be moved. Those in favor of the move believed that the new location would attract more people and increase the number of members.

The debate was lively, with strong arguments on both sides. In the end, the proposal was voted down by a narrow margin.

A PEOPLE'S INHERITANCE.

The young men of Adelaide are required to decide whether or not the public park lands shall be leased, and in a measure alienated. The proposal is that 17 clubs, consisting of 400 members, should be formed, and that every member of the community should be admitted at a nominal fee of 50 a year, for a period of 21 years. The proposal is supported by the University, and the municipal authorities have voted in favor of it. It is expected that the proposal will be accepted by the members.

The proposal is based on the idea that the community should have control over its public park lands, and that the lands should be used for the benefit of the community as a whole. The proposal is supported by the University, and the municipal authorities have voted in favor of it. It is expected that the proposal will be accepted by the members.

UNIVERSITY OF ADELAIDE.

A meeting of the council of the University of Adelaide was held on Wednesday at the University. The council was informed of the progress made in the building of the new library, and of the plans for the addition of new classrooms.

The council was also informed of the progress made in the building of the new library, and of the plans for the addition of new classrooms.

MEDICAL STUDENTS IN HOSPITALS.

Sir Joseph Burke, speaking at the annual meeting of the Children's Hospital, today, made a strong plea for the admitting of medical students to the hospital. He said that the hospital was overcrowded and that there was a need for the hospital to be able to accommodate more patients.

He also called for the hospital to be able to accommodate more patients.

The plea was supported by many of the medical students who were present, and they made a strong case for the admitting of medical students to the hospital.
