CAPS AND GOWNS.

From EDWARD HOWARD—The display of the University robes and the appropriate academic dress is the privilege of the University. Many members of the staff had the opportunity to see the robes displayed on February 9. The robes are made of silk and are of a dark blue color. The cap, which is worn by matriculated students, is made of black velvet. The gown, which is worn by non-matriculated students, is made of black cloth. The robes are to be worn at all University functions, except in the case of private dinners.

SPECIAL SENIOR EXAMINATION.

The special senior examination, which takes place in February, was originally intended for students who had failed in the November examination. The examination is open to all students who have not passed the November examination, but the opportunity to have another test, might be limited to students who have not passed the November examination. The examination is held on March 12 in the University. The privileges of the examination are the same as those of the November examination, with the exception that a record of the examination is kept for the benefit of the students.

MISSING VIOLIN RECOVERED FROM 1921.

Details of the disappearances of a valuable violin from the Hopper Collection and its subsequent recovery were reported at the recent meeting of the University. It appears that the violin, which was valued at $10,000, was stolen from the University Library on February 11. The violin was recovered on March 3, after being found in the possession of a student who had purchased it from a street dealer.

NEW UNIVERSITY PROFESSORS.

There will be several changes in the staff of the Adelaide University this year. Professor Harvey Johnson will take up the duties of Professor of Economics and will lecture on statistics. He was appointed in 1923, but has been on leave for the past two years. He will be joined by Professor John McKeown, who will lecture on the History of Art. Professor McKeown has been on leave since 1921, but has been appointed as a sessional lecturer.

URBRAE ESTATE.

Handed Over to University.

On Saturday, the daughters of the late Mr. A. L. Dixon, of the estate, were presented with a magnificent endowment of land and buildings by the University. The estate, known as the 'Fairway,' was formerly owned by the late Mr. A. L. Dixon, and is situated on the outskirts of the city. The estate is comprised of 200 acres of land, including 100 acres of grazing land. The buildings, which are situated on the eastern boundary of the estate, consist of a manor house, a large stable, and a small cottage. The estate is valued at $150,000.

The Angas Engineering Exhibition, which is the annual exhibition of industrial designs, is to be held on March 15. The exhibition is open to all students of the University, and is held in the University Library.

CUPS AND GOWNS.

From "A.B.C.D. and Co."—I would like to congratulate the Committee of the University on the successful conduct of its examinations. The Committee has done an excellent job, and I would like to express my appreciation of the efforts of the Committee.

Professor W. K. Rigden.

The discovery of Röntgen X-rays has revolutionized the field of medical science. The X-rays have been used in the treatment of a variety of medical conditions, and have been instrumental in the diagnosis of many diseases.

CAPS AND GOWNS.

From EDWARD HOWARD—"A.B.C.D." suggests that there is no law to prevent the proliferation of academic dress. However, there are cases where the wearing of academic dress may be inappropriate, especially in situations where the academic dress may be harmful or offensive. The University should consider the use of academic dress in such situations.

The Röntgen Rays.

In the construction of the edifice of scientific knowledge, one stone is laid each day. The construction of the edifice is a slow process, and there are many obstacles to overcome. However, the progress of the edifice is steady, and the foundations are strong. The foundations are due to the efforts of the scientists who have laid each stone.
