The treatise was opened with a statement of the provisions of the Code of Khammurabi, and it set out that although there was evidence of the existence of suretyship in Babylonian and Assyrian law long before that time, the code referred to recognised and regulated the pledge and forms of suretyship. Through Abraham suretyship probably became familiar

From there Dr. Hewitson traced its history through the Greek, Roman, and early Germanic laws down to practically the beginning of English legal history, dating back to the Anglo-Saxon and Anglo-Norman periods. Then he discussed its development and forms in modern law, and pointed out that as a matter of juristic origin suretyship began with Rostage (the pledge of the person) and ultimately developed into the modern contract and judicial forms of suretyship, including bail. Dr. Hewitson is a member of the Central District Licensing Court, magistrate of the Children's Court, and assistantmagistrate at the Adelaide Local and Police Courts, and is also deputy-coroner.
