In recent years, cosmopolitanism has been a major topic of discussion in Europe. The term is derived from the Greek words "kosmos" (world) and "polis" (city), and it refers to the idea of a global community that transcends the boundaries of nation-states. Cosmopolitanism is often associated with the idea of a universal culture and the promotion of universal values and principles.

In the context of the current image, the text discusses the influence of religion on society and the role of education in promoting cosmopolitanism. The text cites historical examples of religious movements and their impact on social and political landscapes.

The text also highlights the role of education in fostering cosmopolitanism. It mentions the importance of education in promoting critical thinking and a tolerance for diversity. The text concludes by emphasizing the need for continued efforts to promote cosmopolitanism in a world that is increasingly interconnected.
