**UNIVERSITY APPOINTMENTS.**

**LECTURERS AND TUTORS.**

The University Council, at its meeting on Friday, made the following appointments:

**Lecturers.**  
 Lecturer on the Principles and Practice of Surgery—Dr. W. R. Cavenagh-Mainwaring.  
 Lecturer on Public Health and Preventive Medicine—Dr. F. S. Hone.  
 Lecturer on Gynaecology and Obstetrics—Dr. T. G. Wilson.

**Tutors.**  
 In Medicine—Dr. W. Ray.  
 In Surgery—Dr. B. Smeaton.  
 In Obstetrics—Dr. B. H. Swift.  
**Assistant Tutors.**  
 In Medicine—Drs. D. R. W. Cowan and Guy Lendon.  
 In Surgery—Drs. M. L. Scott and J. Corbin.  
 Miss Mary C. Dawbarn, B.Sc., and Mr. H. R. Marston, demonstrators in physiology and bio-chemistry.  
 Drs. Mildred Maccato and R. T. L. Grant, demonstrators in pathology.

The Union had a modest beginning. A visitor to the United States was much impressed by the extraordinary lack of knowledge in the United States concerning the British Commonwealth and British institutions, only counterbalanced by the amazing ignorance of American conditions in Great Britain and in many parts of the British Empire, and by the extraordinary hospitality and friendliness displayed to the travelling Briton in the United States—a hospitality which made the traveller feel much ashamed of the welcome extended by the old land to many visitors from across the seas. So the notion of effecting an improvement in these directions took root, and the result was the English-speaking Union. On December 31, 1918, the total membership was 868, but by the end of 1922 it had grown to 10,732. During the present year further rapid strides have been made, and there are now branches in many centres, including Adelaide, Melbourne, Perth, Wellington, Paris, and Rome.

One of the aims of the organisation is to establish clubs in the large centres for the use of members. Already much useful work has been done by the club established in London (near Trafalgar-square). If, for example, an agriculturist from Illinois comes in, wishing to visit the experimental departments of an English agricultural college, he has only to produce his credentials and mention his desires, to find himself the following day the honored guest of the college. The E.S.U. people claim that they are never at a loss. Daily they give advice about lodgings or arrange for personally conducted tours of those elusive bits of London so baffling to strangers, put professors and teachers in touch with English education from the inside, give overseas women the chance of studying social service work and the position of English women in the professions and industry, give garden lovers the opportunity of strolling through exquisite English gardens and being welcomed as guests in charming homes and render assistance in a variety of ways.

A meeting in connection with the movement will be held at the Town Hall tomorrow at 2.30 p.m. The Lord Mayor will preside.

**Pen Portraits of People**

**After Forty Years**

Mr. C. R. Hodge attended his last official commemoration at the Adelaide University this week. His resignation as Registrar takes effect in February. His departure from the cloistered business of 'Varsity life will make a difference to many who have loved the man for his work faithfully done and his kindness and willing help at all times.

Mr. Hodge is retiring owing to ill-health. He has spent 40 years among

Mr. C. R. Hodge

undergraduates of all descriptions. In that time he has not missed a commemoration, and he has seen every degree awarded by the University with the exception of eleven in arts, given prior to 1884.

Mr. Hodge admits that it will be a great wrench leaving the institution after so many years. It was in a small way when he entered its portals in 1884, and it has been his privilege and delight to take part in its development. He has seen a mere 10 students at work when there were degrees conferred only in Arts and Law. Today there are 2,000 noisy undergraduates who are enabled through development to take degrees in all manner of studies.

Mr. Hodge loves his fishing line, and could tell many a good fish story. He was a great horseman in his earlier days, and he was given to cycling and walking as recreations. His gun has done good business in its day, and his pen has given us a novel and some pamphlets. When first he went to his duties he was an ardent cricketer, but he soon found that demands upon his time precluded practice, and the time came when either cricket or the University had to be thrown to one side. The 'Varsity won!'

Mr. Hodge deserves his rest, but his ghost will walk o' nights in the 'Varsity and his memory will never stale.

**School of Mines Principal**

From a huge room, frowned on from the walls by the men who have guided the school through the years, with books, a desk, a long table, innumerable papers, and deep silence for company, Mr. F. W. Reid, B.Sc., controls the varied workings of the School of Mines.

It needs no close observation to see that Mr. Reid is the man for the job. He is keen and dark, with piercing eyes; with hair black and still abundant, though with silver threads; of slight, spare build; energetic and enthusiastic. During his association with the school he has amply proved himself capable and worthy of the responsible position he holds.

He was born in New Zealand, where he received his early education. When 17 years old he went to Tasmania for practical experience in mining and metallurgy. Then he came to Adelaide, and studied at the School of Mines. Gaining a diploma in 1900, he subsequently returned to Tasmania as director of the Zeehan School of Mines. In 1911 he became lecturer in metallurgy at the Adelaide School of Mines, and two years later, on the retirement of Mr. L. Laybourne Smith, was appointed registrar, a title afterwards altered to that of principal.

He holds the B.Sc. degree of the Adelaide University, and is the only graduate of the School of Mines who holds three diplomas. These are for mining,

Mr. F. W. Reid, B.Sc.

metallurgy, and engineering. In addition to his administrative work he lectures at the school in the higher branches of metallurgy, and in the University in dental metallurgy.

Mr. Reid is secretary of the South Australian branch of the British Science Guild, and secretary of the local committee of the Commonwealth Institute of Science and Industry. During 1921 and 1922 he was president of the South Australian branch of the Australian Chemical Institute.

**THE ENGLISH-SPEAKING UNION.**

**A RENDEZVOUS IN LONDON.**

It has been truthfully said there is no lonelier place than a great city, and perhaps nowhere is this more true than in London. The object of the English-speaking Union is to establish clubs in the world's metropolis and other large centres where members may be sure of a welcome. The value of such an institution is likely to be widely appreciated during the progress of the Empire Exhibition, not only by Australians and Americans, but by all English-speaking people.

The English-speaking Union aims at increasing the knowledge of one another possessed by the English-speaking peoples. It aims at no formal alliances; it has nothing to do with governments; it is merely an attempt to promote good fellowship and understanding among the English-speaking democracies of the world. In its prospectus it says:—"In their common language, traditions, and ideals, America and the British Commonwealth possess a great common heritage. The unbroken peace which for more than a century has prevailed between the two nations, and the 3,000 miles of unarmed frontier existing between the United States and Canada, are outward symbols of that informal bond which unites these two great sections of the English-speaking peoples. The sacred task to which we now set our hands is to perpetuate and develop the existing sense of comradeship and brotherhood, and thus ensure peace for ourselves and for all nations. Membership is open to citizens of the British Commonwealth of Nations and of the United States of America. The English-speaking Union is non-partisan, non-sectarian, and is open to men and women alike. It does not concern itself with the internal politics of the English-speaking peoples, and membership does not in any way conflict with the duties of good citizenship. It is realised that each member's first duty is to the land of his birth or adoption."

Among the practical objects of the Union are the following—(1) To make the English-speaking peoples better known to each other by:—(a) Interchange of representative speakers; (b) correspondence; (c) the printed word; (d) an interchange of University professors and students; (e) correlating our ideals and methods of education; (f) promoting trade and commerce; (g) sporting contests; (h) and by any other means calculated to remove mis-understanding and to promote unity of national purpose. (2) To celebrate jointly such festivals as:—Washington's birthday (February 22); Shakespeare's birthday (April 23); Empire Day (May 24); Magna Charta Day (June 15); American Independence Day (July 4); Armistice Day (November 11); American Thanksgiving Day (last Thursday in November). The foregoing are arranged in order of date. (3) To establish branches throughout the British Empire in reciprocation to the English-speaking Union of the United States.

**EDINBURGH UNIVERSITY.**

**Princely Rockefeller Gift.**

LONDON, December 18.  
 The trustees of the Rockefeller Foundation of New York have made a gift of £50,000 to the Edinburgh University for the purpose of erecting a chemical laboratory, and to complete the endowment of the Professorship of Surgery at that institution.—Reuter.

Dr. J. A. G. Hamilton has returned from Western Australia, to settle down in South Australia. He was compelled to dispose of his property at Katanning on account of his health breaking down. He has already renewed acquaintance with many old friends.

**University Vacation**  
 From Saturday, December 22, until January 12 inclusive the University of Adelaide will be closed.
