The matter of cost.

Adelaide University to the fore.

In the discussion at the Medical Congress, in Melbourne, on the subject of cost of medical care, the argument was referred to the cost of the drug, and stated that a treating pensioner in England was a second-class citizen. The cost of outlook was estimated as 100 per cent. in the country, and 10 per cent. in the city.

Dr. Professor Duffield (Adelaide) pointed out that the Adelaide University authorities had been successful in lowering the cost of medical care, and that this was being done through the operation of a medical laboratory. The cost of patients' treatment in the laboratory was reduced by one-third, and that the patients were being treated for less than a dollar a day.

The University of Adelaide is known for its medical school, with a strong emphasis on research and clinical practice. The university offers a range of undergraduate and postgraduate programs in the field of medicine, including a Bachelor of Medicine, Bachelor of Surgery (MBBS) degree, which is the standard medical degree in Australia. The university also has a strong research focus, with several centers and institutes dedicated to medical research.

In addition to its medical school, the University of Adelaide is also known for its programs in the arts, sciences, business, engineering, and more. The university has a strong history of academic excellence and has produced many notable alumni in a variety of fields. The university is located in South Australia and is one of the oldest universities in the country, with a long tradition of academic achievement and innovation.
