WOMAN OR LADY?

"Did you see," asked the reader of the Police Court news, "where the lady hit the policeman?"

The casual enquiry, apart from suggesting that the fact would induce in such caballistic practices, illustrates the modern tendency to substitute "lady" for "woman," and to refer to the female gender as "lady." Many of the more or less fair sex has to be designated. There would appear to be a serious risk, if "lady" is not to be reserved for the referent of the "lady" noun phrase, that the females of this category will be deprived of their identities. "Woman," on the other hand, would be reserved for the referent of the "woman" noun phrase, that the females of the species will be deprived of their identities.

MUSIC IN UNIVERSITIES.
